WINCHELL'S
Patent Oil Tank.

Patented Sept. 26, 1871

With improved double action continuous steam Pump. *Six strokes of the piston will fill a gallon measure. A barrel can be emptied in seven minutes.* The air-chamber is always full, and one stroke of the piston brings the oil, no matter how little may be in the tank.

Showing how the pump may be removed and oil transferred from a barrel to the tank. Retailers and consumers of oil should have one as a matter of safety convenience and economy.

WEEKLY REVIEW.

There is a fair trade doing in all lines, considering the lateness of the season. In oils, lard is stiffer, while linseed is rather easy. Cocoanut is firmer in consequence of stronger advices from Ceylon. There are few changes in paints. Pig lead is easier; chalk is higher. The chemical market is dull and without important change in price on the heavy goods. In light chemicals chlorate of potash and tartaric acid are lower and arsenic is higher. The drug list shows a number of changes, the most important being a reduction in quinine.

Our local money market has been firm and on call loans rates have been 4@6 per cent, while time loans ar quoted at 4½@6 per cent on governmentstock or collaterals.

Prime commercial paper is in demand at 4@6 per cent for double named. Government bonds have been steady. The closing prices bid on Monday were as follows:

U S 6s, 1880 reg	102¾
U S 6s, 1880, coupon	102¾
U S 6s 1881, reg	104⅜
U S 6s 1881, coupon	104⅜
U S 5s, 1881, reg	101⅛
U S 5s, 1881, coupon	101⅛

SPECIAL NOTICE.

Mr. J. J. Comstock is no longer connected, in any capacity, with the OIL, PAINT AND DRUG REPORTER.

THE STANDARD OIL COMPANY'S LATEST MOVE.

The publishers of trade papers have their troubles as well as other people. Some time since the organ of the oil and paint interest here indulged in some pretty plain speaking with reference to a well-known powerful oil corporation, whereupon the latter retaliated by bringing the publishers into Court to answer; but, the suit not being a success, an opposition journal has been started, under its auspices it is said, to run the party of the first part out of the field; and this is accompanied by an intimation that it will spend $1000 per week, if necessary, to accomplish its purpose.—*New York Correspondence Philadelphia Ledger.*

THE CONSOLIDATED LINSEED OIL COMPANY AND THE DEALERS.

The Consolidated Linseed Oil Company of the West has issued, under date of Nov. 24th, a circular to the dealers in oil, accompanied by a card for their answer, and to which, it is not too much to hope, a general response will be given. The circular reads as follows:

The recent discontinuance of the rebate system by this Company, for the reasons stated at the time, has provoked much discussion, and a number of letters have been received from dealers advocating the restoration of the system. The Consolidated Company desires to carry out what may be for the best interests of those concerned, hence this circular.

The rebate system particularly and directly interests the dealer, but only indirectly affects the manufacturer, as his profit does not depend upon it. The dealers, therefore, should decide whether linseed oil shall be sold under the rebate plan or not; and that this Company may be advised of their wishes the enclosed cards are issued

The Consolidated Company feels that its duty does not end in making a profit for itself, but that its efforts are equally due to those who invest their capital in its product; and will carry out the wishes of the trade (as may be indicated on these cards), to the best of its ability.

The success of the rebate system or any other method devised for guaranteeing a certain fixed profit to dealers in an article in which there is so much competition as in linseed oil, depends entirely upon the active, faithful and honest co operation of all dealers and their support of the plan. The dealer who determines to stand out, while his neighbors endorse the plan, or who cuts quietly or openly is short-sighted and ultimately defeats his own object.

In the REPORTER of October 20th in considering the practicability of combinations we reviewed the experiences of both the Consolidated Oil Company and the White Lead Association, and stated that we should, in the future, "doubt the success of any association formed for purposes similar to these, unless it be organized at the solicitation of the dealers and sustained by their undivided purchases and their unequivocal adherence to its rules." We also expressed the conviction that the crushers and corroders would entertain about the same views, and that they would "refrain, in the future, from entering any organization whose benefits are to extend to the dealers, unless they have the most convincing assurances that the latter will in good faith, sustain them." The recent action taken by the Consolidated Company seems to fully accord with the view we expressed, though we did not anticipate the novel and, we trust, efficient means the company has taken to ascertain the position of its customers. We unhesitatingly endorse the language of the Company's circular, in so far as it refers to the benefits which dealers derive from the rebate system, and the proper restrictions governing the same. Both the White Lead and the Linseed Oil Combinations have been more profitable to the dealers than to the manufacturers, although they have, when rigidly lived up to, been of no small advantage to the latter. The restrictions placed upon the dealers in the last instance by the Consolidated Co. were not all of them such as strengthened its position. The advantages of the protection afforded by the organization were not underestimated by the trade, but the conditions under which they were obtainable were distasteful to many and tended to lessen the favor with which it was regarded. The experience which the Company has had should enable it to adopt a series of rules and regulations that should obviate any clashing between its interests and those of its customers We trust that the replies to the Consolidated Co.'s circular will be so numerous and so convincing that it will feel warranted in renewing a system of rebates. That the system shall be free from the few defects which were a serious drawback to the previous regulations, is certainly desirable, and a not unreasonable expectation.

THE TRANSACTIONS IN QUININE.

During the last few weeks there has been a large business done in sulphate of quinine, both on the spot and in deliveries running into the spring months. While the latter were, of course, speculative, there seems to be some doubt as to what extent the spot transactions have been based on actual demands. So far as we can learn, they have been largely for the purpose of supplying the existing wants of pill manufacturers and of dealers. It would appear, from the purchases made by the latter, that there has been a larger consumption during recent months than was generally supposed to have occurred, and their stocks had, in consequence, been materially reduced. It is possible that they have been led to anticipate their actual wants somewhat by the seeming cheapness of quinine, and it is certain that their large purchases and the comparatively low price have induced quite a strong speculative feeling in others, resulting in most of the sales for forward delivery and some of the spot operations. The chief incentives to speculation in quinine seem to be the high cost of bark and the fact that the price of the alkaloid is already below the point which the fluctuations of the last few years would seem to indicate as its minimum value. We have been led to regard $2 50 per ounce as the figure below which quinine was a good purchase, and it is the influence of this popular belief which prompts speculation at the present time. It is not our intention to discourage this estimate of the value of the alkaloid, but it may not be amiss for our readers to consider the chances of its being a false one. In the event of a malarial epidemic a demand for quinine and an advance in its price would occur, beyond doubt. With the assurance of such a visitation upon any section of the country next year, the purchase of quinine would be a most inviting investment. Lacking this assurance, it becomes worth our while to consult the conditions which affect the cost of the article, and which are likely to influence its future value. The price of quinine, in times of ordinary consumption, may be said to be virtually in the hands of the Continental makers. It has already been proved that by using this market as an outlet for their surplus they could undersell all other makers, and whatever defects may exist in the quality of some of the least favorably known German brands, it is evident that they will almost any of them find purchasers at ten cents per ounce below the best known domestic makes, while some of the more popular German makes will find equal favor at a less difference. This being the case, the domestic brands, or any of the foreign brands cannot long remain very much above the lowest price for foreign. The freedom with which these makers can produce the alkaloid has been demonstrated since the duty was removed from imports into the United States. The question which most interests the speculative buyer is the price at which the Continental makers will stop delivering. When that is determined, we shall know the minimum value of quinine, and shall be able to estimate the chances of its advancing without the stimulus of a specially active consumption. The cost of bark is not a safe criterion of the value of the alkaloid. It is reasonable to assume that any material rise in bark must be met by an advance in the product, but the varying percentages of alkaloid in different barks; the relation of quinine to the other salts, and the cost of manufacturing, are all secrets which no one except the manufacturer himself can reckon upon intelligently or with any degree of accuracy. The reduction in the price of the sulphate by the domestic makers, on Saturday last, proves what we have said respecting their inability to keep prices very much above the level of the cheapest German brands. Beyond that it proves nothing either for or against a further decline or an early advance. Those fluctuations depend, as we have already suggested, upon the action of foreign manufacturers, or upon an extraordinary consumption.

"WEARING THE COLLAR."

One of the coinages of the recent political campaign, as our readers are probably all aware, was the term "wearing the collar," the implied meaning of which is obeisance to that particular form of political magnate known as a "boss." The term, like most colloquialisms, aptly expresses the condition of the men to whom it is applied. One naturally associates it with a condition of servitude and subjection. It readily suggests an ownership vested in some one else. The political "boss" is, more or less, a despot, and "wearing the collar" is a figure of speech, which, however vulgar, fitly expresses the relation of his henchmen. The undeniable truthfulness of this assertion is a most mortifying commentary upon the political methods of the World's greatest Republic. But it is far sadder to reflect that in this same Republic we are not wanting in conspicuous attempts to introduce "bossism" and the "wearing of the collar" into mercantile life. Dangerous though it may be, "bossism" is not wholly unnatural in politics, and the obvious danger should have led us to guard against it before it gained an existence. History teems with the records of personal ambitions which tend to the centralization of political power, and of these "bossism" is simply an ignoble example. But we are not so warned by history of the dangers of a similar centralization of mercantile power. What, in the history of the World, could have suggested the possibilities of a monopoly so gigantic as the Standard Oil Company? The East India Company and the Hudson's Bay Company became corporations of unparalleled wealth. But they owed their existence to acts of the British Parliament, and the same authority in time curbed their growth. It is but just to them to say that their prosperity was the result of the circumstances which they legally enjoyed, and was not achieved by means in any sense illegitimate. It is different with the Standard Oil Company. We are ready to believe that as a corporation it exists by virtue of a charter, legally granted. But the acts by which it has gained its present position were never contemplated in any charter or in any law or principle of trade upon which the right to corporate existence is based. It represents rather, in a commercial sense, the ambition, greed and disregard of principles of which political "bossism" is the prototype. Like the political "boss" the Standard has its "collar," and every henchman, whether he be a follower by preference

or from coercion, must wear it. To be sure he may cover it from the public view, if he can, but he must wear it, and the key is only to be found in the pocket of the president of that institution. The "collar" is not usually put on at one operation; it is gradually forged around the neck of the victim, and it may not be amiss for the dealer who believes himself free from this badge of servitude, to observe if the first ring is not already around his neck. Whether he is at liberty to buy any or all of his oil from whomsoever he please, or is already suffering from the dictation of the Standard. There is not a department of trade to which it is even remotely related but what it seeks to control. Every branch of the oil trade is the object of its ambition, and every dealer is its coveted prey. In the more remote States to which the lines of transportation are limited in number, and therefore more readily controlled, the Standard has gradually extended its power, until dealers will soon be able to obtain no supplies of petroleum oils, lard oil, cottonseed, linseed or castor oils, or even of lard and tallow, except through the agents of the monopoly. The trade of Texas is already almost entirely given over to the Standard, and its scheme is to obtain similar control in every Southern State. Its relations to the railway lines running through that section, and its ownership of the tank cars, make that the easiest field to capture, and when it has strangled opposition in those and in the far Western States, and has forged its "collar" about the neck of every dealer there, it will proceed to "corral" the consuming trade of the Eastern and Middle States. We do not overestimate the ambition of the Standard; we could not overstate the danger which that ambition portends to the jobber and the retailer, if it is not urgently and persistently resisted. Look out for the "collar!"

TRADE ITEMS.

Mr. J. W. Tiemann, of D. F. Tiemann & Co., the well-known paint house, arrived by the "Britannic" on the 21st inst. after an extended pleasure tour through England, France and Italy.

The Parrott Varnish Co. of Bridgeport, Conn., favor us with their newest illustrated advertising card, which, in a most graphic manner, portrays the impregnable position occupied by their popular goods.

The case of Carl L. Recknagel *et al.*, against Thomas Murphy, as collector of this port, for the recovery of duties on certain imports of argols, was decided in the Supreme Court of the United States last week, on an appeal on error, against the plaintiff. The rulings of the Court below, from which appeal was taken, were affirmed with costs.

The chief of the Bureau of Statistics reports that the total values of the exports of petroleum and petroleum products from the United States during the month of September, 1880, were $3,712,763, and during September, 1879, $3,419,180. For the nine months ended September, 1880, $24,989,343, and for the same period in 1879, $26,060,630.

Our active friend, Mr. Wm. Birnbaum, of the old-established house of Mansell, Birnbaum & Co., has associated himself with a worthy object now prominently before the public of New York. We allude to the coming grand Hebrew Charity Fair, to be held at Metropolitan Concert Hall, in December next, of which Mr. Birnbaum is an active promoter, and for which he is authorized to receive donations.

The Jamestown *Journal* has been going into statistics and finds that the Standard Oil Co. has eleven pumping stations between Bradford and New York. It controls over 400 tanks, holding 11,000,000 barrels of oil. In laying the pipes, twenty-five men constitute a gang, and they lay 200 joints, or from two-thirds of a mile to one mile in a day. The highest altitude crossed by the pipes is 2,000 feet above the sea level.

The Titusville *Herald* thinks that Parker, Pa., seeing that the oil business had left it, has shown good sense in starting manufactories. The glass factory is in full blast, employing about fifty men and boys. The capital stock of the company was $22,000, and taken by citizens. Fifty dollars was the prices of shares. The business is profitable. The common sand stone is used, free from iron, such as is abundant around there, they running principally prescription vials from half an ounce to a pint bottle; also flasks. Titusville might do likewise.

Mr. George Yaxley, representing Messrs Wm. Harland & Son, of Merton, Surrey, England, returned to this city last week from a two months tour through the Western Pacific States and Canada, in the interests of his firm. Mr. Yaxley, like most of his countrymen, wishes to spend Christmas at home, and to that end will sail on Thursday on the "Baltic." His friends here will couple with good-byes the wish that he may be more fortunate than last year, when, in consequence of adverse winds, he was obliged to celebrate the holiday aboard ship.

Much has not been heard lately of the smuggling of bay oil, but on Friday evenning last Customs Inspectors Cavanaugh and Pratt arrested Ulrich Tjarks, lately the quartermaster and now the third mate of the Pacific Mail steamer Acapulco, for carrying away from the vessel four bottles of bay oil, concealed beneath his vest. The officers followed him from the dock to Greenwich street, and there searched him. The prisoner said that he was on his way to the Battery, to meet a man who was to take the oil to Brooklyn, but he refused to give this person's name. Tjarks was locked up over night in the Customs seizure-room, and on Saturday morning waived examination before Commissioner Shields, who held him in $1,500 bail. A search of the Acapulco was made on Saturday, and the inspector seized 18 more bottles of bay oil, which were concealed in the coal bunkers and the carpenter's shop. It is understood that a libel against the Acapulco will be filed by the United States District Attorney. As our readers are aware, the oil is dutiable at 50 cents per ounce, and the bottles usually hold 22 ounces. The market price of this oil is generally about equal to the duty.

BUSINESS CHANGES.

DRUGS.

Woodland, Cal—J P Bush is dead.

Pueblo, Col—A Steinberger has sold out to F M Richie & Co.

Denver—J Durbin & Co have sold out and new firm continue under style of McCarthy & Osborne.

Silver Cliff—W L Allen has taken in J J Vetter.

Atlanta, Ga—H L Wilson has changed style to Wilson & Tyner.

Austin, Ill—R H Fraill has given a mortgage for $200.

Chicago—Lord, Stoughtenburg & Co have been burnt out; E W Brown & Co are advertising to close out.

Princeton—A A Woods has given a realty mortgage for $2100.

Streator—Elder & Mills have given a mortgage for $400.

Greenville, Ind—R Kay has given a mortgage for $500.

Plymouth—Poe & Chapman have dissolved and Chas D Chapman continues.

Greenleaf, Kan—Whetstine Bros have sold out to John B Freeman.

Williams, Ky—R M Oates & Bro have dissolved and R M Oates is alone.

Portland, Me—T B Pollard has given a mortgage for $400.

Boston, Mass—E C Marshall has paid off a $500 mortgage.

Needham—E A Kingsburg has sold out to Jos T Webster.

Chesaning, Mich—W H Niver Jr has been partly burnt out.

Detroit—W I O'Brien has given a mortgage for $117.

Dodge Centre, Minn—Head & Co have been closed by the Sheriff.

Wabasha—J J Stone has been burnt out fully insured.

Breckenridge, Mo—S J Dewey has sold out to H Keeny.

Kansas City—W K Hawkins has given a mortgage for $897.

St Joseph—Chas L Sherwood has sold out to Jas T Meadows.

Jersey City, N J—Louis Pfaehler has renewed a mortgage for $1250.

Newark—Bolles Bros have given a bill of sale.

Brooklyn, N Y—Thos P Morris has given a mortgage for $1200; A Schworzenbach has given one for $1500.

New York—C Krausche has given a mortgage for $600; James Gould is dead: E Weickert has given a mortgage for $550.

Alstead, N H—C K Klas has had a fire, most of the stock saved and loss fully covered.

Akron, Ohio—Byrider Bros have dissolved.

Cleveland—L A Heydorn has given a mortgage for $222.

Philadelphia, Pa—Carman & Beck have been sold out by the sheriff.

Providence, R I—Clarke & Durfee have dissolved and Clark & Arnold continue.

Toronto, Ont—W J Mitchell has sold out to S W B Smith and gone to Winnipeg.

Whitby—S W B Smith has sold out to W R House and gone to Toronto.

OILS.

San Francisco, Cal—J T Daly has been attached.

Brooklyn, N Y—Geo Pool & Sons have been burnt out.

Cleveland, Ohio—Masters & Shurtliff have given a mortgage for $2500.

London, Ont—Moses Wilson has gone away.

PAINTS

Boston, Mass—W L Barrus has given a mortgage for $300.

Detroit, Mich, S H Hart & Co are in the hands of a receiver.

Philadelphia, Pa—Jos Boteler & Co have dissolved and Edward D Blair will settle; Bihn & Co have had a fire, no insurance.

Halifax, N S—Jas Reardon has a judgment for $1749 against him.

CONFECTIONERS

Washington, D C—Geo Voneiff has had a trust deed cancelled.

Upper Alton, Ill—M Johnson has been burnt out.

Searsport, Me—J T Trundy has sold out to B O Sargeant.

East Hampton, Mass—Chas Leland has sold out.

Eagle Lake, Minn—E Ewing has gone to Janesville.

Central City, Neb—D P Emery has sold out.

Newark, N J—C E Dully has given a mortgage for $200.

Albany, N Y—Wm H Wallace has given a mortgage for $572.

Albion—W H Hawes has sold out.

Troy—O Kleeman has given a mortgage for $100.

Menasha, Wis—W Nusbicker has sold out to Geo Robinson.

SASH, DOORS, ETC.

Biddeford, Me—Eben Chapman has sold out to Small & Grant.

Fairfield—C D Lawrence & Co have been attached for $500.

SOAPS.

Boston, Mass—Wm M Stevens Jr has given a mortgage for $963.

PAPER MANUFACTURERS.

Georgetown, D C—G Hills Jr has settled a trust deed.

Flint, Mich—H N Mather has gone to Jackson.

Rockingham, Vt—Moore & Arms have sold out to Fisher & Flint.

Alstead, N H—Warren Moore has been burnt out; loss $1800 over insurance.

NEW INVENTIONS.

(Specifications furnished for 50 cents.)

ARTIFICIAL INDIGO BLUE.

The coloring matters belonging to the chemical group of which indigo blue may be considered the chief representative, are pricipally characterized by their peculiar molecular arrangement, which may be defined as being built up by the union of a molecule of benzine, an atom of nitrogen, and a side chain containing two atoms of carbon, both the side chain and the nitrogen being fixed in the benzine residue and relatively to each other in the ortho position. The essential feature of this invention consists in the discovery that the said molecular arrangement may be arrived at by the mutual action of both the side chain and the nitro group in certain derivatives of orthonitrocinnamic acid. The said derivatives are, principally, orthonitrophenyloxyacrylic acid. The former is converted into indigo blue by the mere action of heat. The latter requires for that purpose the action of alkalies and deoxidizing agents. The inventor takes orthonitrophenylpropiolic acid, or any mixture or compound containing the same, and mix it with suitable deoxidizing agents—such, for example, as glucose or milk sugar—and with a solution of caustic or carbonated alkalies or of alkaline earths. The said mixture, upon being gradually heated to a temperature of about 100 deg. centigrade, quickly assumes a blue color, which gradually increases in intensity, owing to the formation of indigo blue in its crystallized condition. The operation is at an end if a filtered portion of the mixture no longer yields any indigo blue upon the application of heat and upon the addition of a further supply of the deoxidizing agent.

DISTILLATION OF OILS.

This improvement is specially designed for and adapted to the production of petroleum distillates of heavy gravity suitable for lubricating purposes, and of high fire test and boiling point, suitable for illuminating purposes, both being substantially free from the characteristic and offensive odor usually accompanying the heavier products of fire-distillation of petroleum. It is not difficult, by the practice of the ordinary process of fire-distillation and by a careful fractional separation of the distillate at different stages of the process, to procure oils of almost any required gravity suitable in respect of their gravity either for illuminating or lubricating purposes. but owing to the tendency of lubricating oils, and especially of petroleum, when exposed to sufficient degree of heat for distillation to form light products of low fire test and essential oils of very offensive odor, which mingle with and impart their dangerous or offensive properties to the heavier distillates, it has been found difficult to procure the heavier gravities of petroleum distillates substantially free from the contamination of these lighter oils and offensive odors. This invention covers a process different essentially from each of these modes of treatment and obviates many of the objections incident to their practice, its essential characteristic being the condensation of the vapor of heavy gravity distillates at a temperature above that at which the lighter gravity oil and odorous vapors will condense, so as to effect the desired separation, not by a regulation of the degree of heat employed in condensation. This is effected by separating from the combined vapours arising from the still during a process of rapid distillation a distillate of the required gravity by condensing its vapor at the highest degree of heat at which it will condense, and at which the vapors of the lighter oils, as well as the volatile particles which constitute or form the vehicle of the offensive odors, will not condense, but will pass off to another part of the apparatus, where they are exposed to a lower temperature, and, being condensed, are conveyed to a different receptacle.

REFINING WASTE LEAD FUMES.

Heretofore the waste fumes from smelting a sulphuret of lead have been caught in a crude state, in which state they were unsuitable as a white pigment, but they were then refined by the joint action of heat and air. When roasted sulphureted lead ore has been used, or any oxidized lead ore, like carbonate of lead or a mixture of much oxidized lead ore with sulphureted lead ore, then the crude lead fumes may be refined before reaching the catching apparatus by passing them over or through a second fire which does not smoke, or by burning generator-gas in the flues leading from the smelting furnace to the cooling and catching apparatus. This method, which is the object of the present patent, cannot be used when sulphureted ore alone is smelted, since in this case only lead amounting from ten to fifteen per cent of the lead in the ore passes off a

fumes, while nearly all of the sulphur passes off. The lead fumes will then be mixed with gases containing a great deal of sulphurous acid gas—much more than can combine with the lead—and this sulphurous acid, in passing over the second fire in company with the fumes, was converted to a great extent into sulphuric acid, sufficient quantity, in a very short space of time, to destroy the textile fabric in which the fumes are collected, besides making the pigment unfit for use without washing.

MANUFACTURE OF ANTHRACENE.

Hitherto anthracene has generally been manufactured from the coal tar obtained by the distillation of bituminous coal for the production of illuminating gas. The quantity of anthracene obtained from coal-tar has been, thus far, small in proportion to the quantity of coal-tar treated. The object of the present invention is to enable anthracene and homologous hydrocarbons to be produced in larger quantities and at a low price The first part of the invention consists of the improvement in the art of manufacturing anthracene or homologous hydrocarbons by the treatment by heat or distillation of petroleum or its derivatives at a dull red heat (say from 400 deg. centigrade to 550 deg. centigrade, or thereabout) and in the presence of charcoal or its equivalent. The second part of the invention consists of a product which may be termed "anthracitic tar," and which is obtained by the before-mentioned process, the said product being rich in anthracene and other hydrocarbons, such as benzine and naphthaline, and being characterized by its freedom from acid matters, such as phenic and cresylic acids. This product is subsequently treated as coal tar is for the production of anthracene and other hydrocarbons. The two raw materials used with success as the basis of this manufacture are crude petroleum and the petroleum tar obtained as a refuse product in the distillation of petroleum for the purpose of manufacturing illuminating oils.

MANUFACTURE OF ALUMINOUS CAKE.

The object of this invention is to decolorize the iron in aluminous cake made from materials such as kaolin, bauxites, etc., by reducing it to the state of a protoxide, and at the same time render the aluminous cake more basic than it otherwise can be made without loss of aluminous material. The inventor in his specification cites defects in several English patents intended to accomplish the same result. He has found that the reduction of the peroxide of iron in a solution of sulphate of alumina will take place if there be introduced into the solution of alum alkaline sulphides, sulphides of alkaline earths, or sulphides of all metals which directly or indirectly decompose water, or such metals that by cold or boiling sulphuric acid evolve hydrogen. By this addition the peroxide of iron is rapidly and most thoroughly reduced to the protoxide of iron.

Pyrites as a Substitute for Brimstone.

The manufacturers of sulphuric acid have been led, through the infrequency of fluctuations in crude brimstone, to get the price of their product down to a point allowing so slight a margin of profit, that such a rise as has recently occurred in the crude material pinches them. For two years or more the average price of brimstone has been $28, the highest extreme being $33. The recent advance to $35 has been of serious consequence to the acid makers, although the market has latterly shown some weakness and appears to be gradually receding to what may be regarded as its normal level. The possibilities of a permanent advance, however, has led a writer in the *Engineering and Mining Journal* to point out that the manufacturers of sulphuric acid might find economy in utilizing pyrites, so abundant in many sections of the United States, as a permanent substitute for brimstone. He points out that pyrites is not only unlikely to fluctuate any in price from year to year, but is so much cheaper than brimstone as to materially reduce the cost of the commercial acids, and correspondingly increase their consumption. It will be observed that in his comparisons, which we reproduce, he gives the price of brimstone as $35, which, as we have already stated, is above the average. Even at $28 there would be a considerable apparent saving in the use of pyrites, but we may remark that brimstone has, within a few years, been down to $23 per ton, at which price, according to his figures, it would be lower than the quantity of pyrites required to produce an equal amount of sulphur. He thinks it is only a question of time when all our brimstone burners must be obsolete; the old countries offering convincing proof of this, and a growing demand for any material or substance, it is well known develops new and cheaper processes for supplying the same. If it is contended that we are not ready for the old country processes, that our conditions are not the same, that we cannot compete with them in salt, coals, or chemicals generally, I answer, that we are not required to produce like materials at prices to compete with their works—established and with the experience of a century perhaps—until our own processes are simplified and perfected, and until we are content to take, as they do, a small per cent of profit on our investments. We have improved, are daily adding to our stock of knowledge in chemical manufactures; but we need to still further improve and cheapen the articles of largest consumption to a point where foreign competition will cease. Chief among these manufactures we need to lessen the cost of all the acids, and with an experience of many years working both brimstone and pyrites, I am led to think the time not far distant when preference must be given the latter.

The following will show the values in pyrites best known to us, results being from "average samples:"

	Capelton Mines Canada.	Spanish	San Domingo	Coal Va.	Brasses.
Sulphur....	46 60	46.00	49.00	47.50	36.
Iron.....	45.00	43.50	43.50	44.00	42.
Copper....	4.10	3 10	3.20	2.60	...
Silver.....	,04 oz	1.4 oz	1.10 oz	..	...
Zinc.....	.15	.30	.35	.20	...
Lead.....	.45	1.60	.93	.60	...

Taking an average of these samples, they would work in a large way 40 per cent of sulphur extracted, or 800 lbs sulphur, at present value, $35 per ton —.....$14.00

Against which we have cost of one ton pyrites, delivered at works in New York and extraction of sulphur as SO_2, say.....$10.00

Leaves profit on each ton pyrites worked, over and above use of brimstone $4 00

One ton brimstone, 94 per cent sulphur (a fair average) =1880 lbs S @$35 per ton.....$35.00

Equivalent to same.....

Two and one-third tons pyrites = 1880 lbs S @$10.....$23.34

Balance in favor of pyrites..$11 66

On works using 10 tons of brimtone daily, this would give a very respectable profit over and above the present very liberal profits supposed to be in the business. If the extraction of the copper were undertaken as the basis of operations, a large mine like the one at Capelton could supply all the sulphuric acid for present use in this country; the market for the same limited only by cost of transporting acids in bulk, and this point met by the fact of their being able to establish their chemical works any where on the seaboard or lakes. Without going into details, it can be seen that the sulphur in such a mine-ore can be made to pay all costs of mining, freights, duties, etc., so that they would virtually have given them perfectly roasted ores for treatment by smelting or liziviating and extraction of precious metals, at favorable points in our country. Further, it would give them the advantage of being able to undersell present manufacturers from brimstone from 30 to 50 per cent. When sulphuric acid of 1·85 Baume can be purchased in New York, Baltimore, Cleveland, Chicago, etc., for one cent per pound, we can hope to have many chemical industries established that now are only dreamed of here, but are live trades in Europe. With low-priced acids, the possibilities are beyond computation, and surely it is well to canvass these matters at the beginning of an era of prosperity for our manufacturers.

Cottonseed Mill Statistics.

In an article on the manufacture of cottonseed oil one of our New Orleans exchanges gives some practical statistics which are interesting, though in some cases not entirely accurate. For instance, it says, four men are employed to every five press boxes. We think the number will seldom be found to exceed two to each five boxes. Its estimates of the value of the products of cottonseed are also mostly below the mark set down by the majority of our correspondents Another point upon which it evidently errs is on the quantity annually exported. The total crop falls considerably short of the 15,000 000 gallons which it gives as the yearly export and the latter would not amount to over 6,500,000 gallons from all ports. The wages paid in the mills are, according to our contemporary, from $1 25 to $3.75 per day. It states "the average yield of a ton of seed is 35 gallons of crude oil, at 30 cents per gallon; 22 pounds of cotton at 8 cents; and 750 pounds of cake, at $20 a ton, making a total of $19.46. Less than 10 per cent of the seed is utilized, yet it brings to the South an annual income of between seven and eight millions of dollars. Of this, New Orleans alone furnishes one-third. As compared with linseed cakes it produces in cattle one-half as much fat and twice as much flesh, and twice as much value for the manure produced. During the year ending September 1 759,932 sacks of cake were shipped from New Orleans to Great Britain, or fifteen-sixteenths of the whole amount shipped from that port As a fertilizer it stands well up to guano.

The oil produced is graded "choice," "prime," "Nos. 1 and 2" and the refined "prime" and 'off" The refuse of the refining is used for soap stock.

The dividends paid by cotton seed mills are very large. Here are a few samples of the last two seasons—1878-'79: Bienville Oil Company, 10 per cent; Crescent Oil Company, 10 per cent; Louisiana 10 per cent 1879 '80: Planters', Bienville and Louisiana Companies, 30 per cent; Crescent City, 20 per cent. Fires are the great drawback to this industry. Fourteen mills have been burned since the war. The region tributary to New Orleans raises each season nearly a million tons of seed. If but half of this be consumed by the oil mills allowing the other half for seed, wastage, etc, this will leave enough to give employment to 8,000 hands and to turn out $12 000 000 of products, to produce 25,000 bales of cotton now wholly lost, and 35,000 000 gallons of oil—enough to supply the whole world with fine vegetable table oil. The very refuse, 180 000 tons of cake, will supply the region tributary to this city with all the meat it wants, and the soap-stock left behind with an ample supply of soap. Such is the picture of what New Orleans might do, while for the whole South the product would be more than three times as great."

The Foreign Petroleum Markets.

The course of the foreign petroleum markets, or rather the apathy manifested by the buyers here who operate for those markets, is surprising, in view of the lateness of the season. The position of the market is not such as to explain the slow action of the export buyers. According to a recent London circular there was at the commencement of the present year a stock in London of 81,131 barrels, with a further 70,000 barrels in the river in course of landing, thus making a total of over 150,000 barrels available, while there was a further large quantity loading in the States for this port. There were many who, on looking at these figures, considered it was quite possible the price might go down to 5d per gallon. The enormous deliveries, however, were caused in a great measure by the London market being by far the cheapest, and thus attracting buyers in the provinces who, as a rule, purchase nearer home, kept the stock within bounds, and the lowest price touched was 5¾d during April. On turning to the Continental markets, the position was much the same, the stock at the commencement of the year at the six principal European ports being 1,317,878 barrels, against 824,715 barrels in 1879, and 734,534 barrels in 1878. Again, looking at the production of crude in America, the stock at the beginning of 1880 amounted to 8,470,490 barrels, with a continued increasing production, against 4,615,299 barrels in 1879, and 3,127,837 barrels in 1878. To sum up, this stock of crude had almost been doubled in the course of the year, while at the same time Great Britain and the Continent had sufficient stock to last them well into the summer without purchasing a barrel from the other side. With due regard to these facts it is hardly to be wondered that the bulk of the trade confidently formed the opinion that low, probably very low, prices would rule throughout the current year. Reverting to the London market, there was nothing very noticeable during the first five months of the year, the trade had quite made up their minds not to make forward purchases, having lost considerable through so purchasing during the three preceding years. Petroleum was sold at 6d for the last four months in 1879. There was plenty of crude oil, it only wanted refining; in fact so plentiful was crude that the stock was increasing at the rate of over half a million barrels per month; therefore why should they buy? These were the arguments used by the trade for not purchasing, and they seemed reasonable enough at first glance; but the one point not carefully considered by them was—from whom had they to buy?

The Standard Oil Company in New York had "cornered" the whole of Europe in 1876, and forced the price up from 9d to 2s 5d. This company was still in existence, and provided they could see their way clear, there was the chance of them doing the same thing again. The Standard company had in fact strengthened their combination by buying up the small outside refineries, and had so obtained the whole refining power in the States. This began to be felt in June, when a sharp rise in price occurred, but this was looked upon more as a spurt than anything else, and the trade regarded it as quite impossible that higher prices could be maintained for any lengthed period. Meanwhile, however, cargoes could only be purchased for prompt shipment, and as the London price remained considerably below that at which it could be laid down for from the States, but few cargoes were bought for London direct. Consumers at the outports, as a rule, could not bring themselves to pay such apparently long prices, and thus but comparative few cargoes were purchased for outports. Turning again to figures, we have a stock in London of 160,000 barrels; add to this about 15,000 barrels now on the way, and we find the total visible stock to be 175,000 barrels. Between October 13 and the end of December last year the consumption was 120,000 barrels; deduct this from our visible stock, and we shall be left with 55,000 barrels—just the quantity consumed in January last! Now, one or two things must happen—either our price must rise to the Ameri-

can figure, or the combination must lower their price to suit us. Considering the wealth of the combination, and looking at what they have previously done, it seems hardly probable that they will accommodate us when just about to reap the benefit they have been working for, and it is more than probable that, as their position gains strength everp day from the fact, or our not purchasing, so they will go on raising the price at which they will supply us with oil. On referring to the Continental figures we see the same position: the visible supply, including all afloat and loading, for the six principal Continental ports, on Oct. 11, was 1,551,501 barrels, and if we deduct the quantity consumed between October and the end of December last year, viz, 1,020,437 barrels, the stock at the end of December will only be 531,064 barrels, or about nine weeks' consumption. The deliveries in this case may, however, be expected to be heavier, as, in the summer of 1879, just previous to the tax on refined oil, very large deliveries were made, thus leaving less to be taken during the winter. These same large deliveries not having taken place this year, we may reasonably expect heavier ones during the winter. Although consumers bought next to nothing forward a large speculative business has been done, and those who have "bulled" the article to their cost for the last two or three years, have this year had a good chance of recouping themselves.

Benzo e and its Derivatives

This name is applied to a lightly oily liquid consisting of equal equivalents of hydrogen and carbon. Since the atom of carbon is twelve times as heavy as that of hydrogen, of course benzole contains twelve times as much carbon by weight as it does of hydrogen. Its percentage composition is: Carbon, 92-3; hydrogen, 7-7. Not every substance, however, having this percentage composition is benzole, for acetylene, a bad smelling gas, has the same composition, and chemists say they are isomeric. To benzole they give the formula C_6H_6, meaning there are six atoms of each element in the molecule, while acetylene has but two of each, and is written C_2H_2. How do they know this? it may be asked. Because the vapor of benzole is three times as heavy as that of acetylene; the former being 39, the latter 13, with hydrogen as a unit.

Before passing on to a description of benzole and how it is made, we must refer to the confusion caused by its having too many names. Faraday, who discovered it in 1825, called it bicarburet of hydrogen, because in those days the atomic weight of carbon was but half as large as now. Next it was called benzine and this name still adheres to it in England and France while in Germany and this country it is called benzole. Here the term benzine is limited very properly to the light petroleum oils which boil between 86° and 100° C.

Pure benzole is formed by heating benzoic acid with quicklime. In a less pure form it is obtained when organic matter is highly heated; thus Faraday found it in illuminating gas made by heating the fatty oils and Woehler made it by the dry distillation of quinic acid. At the present time it is usually made from coal tar, the refuse of the gas house in which it was discovered by Leigh in 1812, and by Mansfield in 1847.

Coal tar is a mixture of a great number of different bodies, both solid and liquid. By distillation it is separated into three portions: the first, boiling below 150° C. (300° F.), is called light oil; the second portion is heavy oil, or dead oil, while a sort of pitch remains behind. Benzole is made from the light oil and the commercial article is very impure, containing only 40 per cent of benzole; the remaining 60 per cent is chiefly toluol, C_7H_8, a substance quite similar to benzole, but of higher boiling point and richer in carbon. This impure benzole makes better aniline dyes than the pure, as we shall afterwards see. By careful fractional distillation a nearly pure benzole is obtained, which is then still further purified by freezing it and pressing out the crystals. Pure benzole boils at 80° C. (177° Fahr.), and when cooled solidifies, forming tufts of crystals, which melt at 5½° C. (41° Fahr.). It is insoluble in water, but soluble in alcohol, ether, and wood spirits. It possesses remarkable solvent properties, surpassing those of benzine or petroleum naphtha. It is an excellent solvent for India rubber, gutta percha, the fixed and volatile oils, wax, and camphor; it also dissolves copal, gum lac, sulphur, phosphorus, and iodine, as well as a very large number of organic bodies. It is very inflammable and burns with a smoky flame. Many accidents have occurred from heating or distilling it over an open fire. If it is mixed with two volumes of alcohol it can be used as a lamp oil. When illuminating gas is passed through benzole its illuminating power is greatly increased. An apparatus for enriching poor gas is sold under the name of Woodward's carbureter.

The most remarkable and valuable property of benzole is its ability to form substitution and addition compounds. Chlorine is able to replace each and every atom of hydrogen in benzole, and besides this, one or more atoms of chlorine, to the number of six can be added to the molecule of benzole.

Mono-chloro-benzole, C_6H_5Cl, is formed when chlorine is passed into benzole containing iodine. It boils at 135°. There are two kinds of dichloro-benzole, one melting at 55° C., the other below zero. There are also two kinds of trichloro-benzole, as well as of the tetrachloro-benzole. Of the pentachloro-benzole, of course, but one form is possible if Kekule's ring-shaped formula is true; yet Jungfleisch and Otto both assert that they have made two kinds. When all six atoms of hydrogen are replaced by chlorine we have a chloride of carbon C_6Cl_6. It is made by pouring benzole on antimonic chloride and then passing in chlorine as long as it is absorbed. It forms silky needles, melting at 200° C.

Thus it will be seen that benzole forms at least nine chlorine substitution compounds. With bromine and iodine it forms nearly as many, although the latter are more difficult to prepare. By the action of chlorine upon benzole in sunlight an additive compound, $C_6H_6Cl_6$, is formed, and in like manner chlorine may be added to the substitution compounds forming such bodies as $C_6H_5Cl_7$ and $C_6H_4Cl_8$.

A much more important series of substitution compounds is that formed by the action of nitric acid on benzole.

Nitro benzole, $C_6H_5NO_2$, in which an atom of hydrogen is replaced by the NO_2 group is a yellow oil, heavier than water, and of an agreeable odor, resembling that of bitter almonds. In commerce it is known as essence of mayrbane. It is formed when benzole is poured slowly into fuming nitric acid as long as the benzole dissolves. The mixture is then poured into a large quantity of water (in which it sinks) and thoroughly washed. It should next be distilled in a current of steam, and may afterwards be distilled *per se*. On a larger scale it is prepared by acting on benzole with sulphuric acid and sodic nitrate or a mixture of ordinary nitric acid (sp. gr. 1.5) and strong sulphuric acid. It is a violent poison when taken internally, two drops having in one case caused death. When pure benzole is employed in its manufacture the purified nitro benzole boils at 210°

(To be continued.)

FOREIGN TRADE REPORTS.

LONDON.

Under date of Nov. 11, George Soanes, Son & Co., say:

Linseed cakes in very moderate demand; cottonseed cakes sell pretty freely, but at lower prices.

Linseed cakes. London made, per ton, £9 15s@£102s 6d; American oblong, Western, in bags, per ton, £9 0 £9 5s; New York and Boston, in bags, (E. I. seed), per ton, £10 2s 6d@£10 5s; Marseilles square, per ton, £9; Cotton Cakes, English, per ton, £6 12s 6d: Cotton Cakes, Decorticated American, per ton, £7@£7 2s 5d.

Linseed oil is quiet but steady at £26 15s in town casks on the spot, and £27 in petroleum barrels, £27 November-December, and £27 January-April. Hull delivery £26@£26 2s 6d spot, £26 2s 6d November-December, and £26 5s@£26 7s 6d for the first 4 months of next year.

Rape and other Seed Oils—Brown rape oil continues very steady at £29 10s@£29 12s 6d spot and to the end of the year, and £29 10s January April—English refined £31 10s—Foreign refined £32 10s—Crude cotton oil lower, £23 5s@£23 10s spot—Refined £27—Hull delivery, crude £22 5s—Refined £25 5s spot and £25 7s 6d November-April.

Olive oils quiet and very little business passing.

Cocoanut oil is again firmer: Ceylon in pipes on the spot £32 5s@£32 10s, for present and future shipments £33 is now the value—Cochin £34@£35 spot; 200 tons January-March shipment have changed hands at £33 15s, and at which price there are still buyers but no further sellers.

Fish oils—Sperm £70, cod £32.

Tupentine, &c—Spirits steady at 33s 6d spot- Petroleum 8¾d spot, and 8⅞d December-January.

ANTWERP.

Under date of Nov. 12, 1880, Messrs. Souheur & Neizert say:

Dyewoods—Business in this article during the past week has been of no importance and prices are nominally unchanged. Import 10,000 kilos red Caliatour wood from England.

Turpentine—Demand sluggish; buyers reserved, and holders, with but a small stock in hand, make no concessions. As a result, values are nominally unaltered and still quoted at fl 21 for American spot spirits and fl 22 for French spot.

Petroleum (refined American): Market quiet. Prices under the influence of discouraging advices from the principal foreign markets close with a perceptible decline. Quotations are: Spot fr 27¾@26½; November 27¼@26, December 26¾@25¾, first 3 months 1881 fr 26@24¼. Stock 107,615 tbls.

Naphtha calm. There is no material change between last week's quotations and those of this; fr33 per 100 kilos is asked for spot; fr32 to arrive by first steamer, fr31 by second. Stock 4970 barrels.

Rosin—There has ruled a good consumptive demand, principally for strained American, which commands fl2⅞ per 50 kilos. French unchanged.

Lard—There has been an animated demand for the mark 'Wilcox" at firm figures. The latest advices from the United States inform us that stock is limited and much below that of the corresponding period of last year. This circumstance keeps sellers on the reserve, and is at the same time a stimulant to buyers to provide themselves against future requirements. "Wilcox" is quoted at present at fr.114½@115 spot; fr 114½ November; fr.113½ December; fr.111½ January; fr.110 February; fr.109 March; fr.108 April, and fr.110@110½ first 3 months 1881. Other descriptions are likewise rising and close at firm quotations, while fr.112½@115 has been paid. Tub lard sells freely at fr.118-20 per 100 kilos. Arrivals 2810 tierces from New York.

Tallow — North American scarce. La Plata is quoted at fr.87@88 for mutton and fr.89@90 for beef.

LIVERPOOL.

Under date of Nov. 12, 1880, Mr. Geo. G. Blackwell says:

Minerals—There is no special change to note in our market this week. Bauxite is gaining favor slowly but surely with the manufacturers of alum, and sulphate of alumina is selling freely at last quotations. Barytes: Carbonate, lump, 80s@85s; seconds, 70s@75s; other qualities, 45s. Sulphate, best, 75s@80s; seconds, 60s. Magnesite, quiet. China clay—Best, 37s 6d@40s; seconds 30s@35s. French sand and cryolite as last quoted. Fullers's earth 45s@50s. Rotten stone, best £10. French chalk: There have been two arrivals this week, and a few sales to report. Best qualities held at £4 15s@£5. Phosphate of lime 1s 2d per unit.

Chemicals—Our market this week has remained steady, and prices on the whole have been maintained. Soda ash 1⅝d; alkali 58 per cent at £9 10s@£10; caustic soda, 60 per cent, cream £8 15s; white, £9 5s; 70 per cent, £10 12s 6; bicarbonate, £10. Chlorate of potash, 6⅝d. Bleaching powder £4 5s@£4 7s 6d. Saltcake 43s@44s. Soda crystals, £3 15s@£3 17s 6d. Alum, £6 5s; sulphate of alumina, £6; alum cake, £3 10s. Arsenic, good brands selling at £10 15s@£11. Bichromate of potash, 6d; copperas 43s. Sulphate of copper, £21; borax £58@£60; chlorate of soda, 1s 9d per lb; blanc fix, £9 15s; chloride of baryta 2s per lb; nitrate, £30. Manganese, sulphate, £17; borate, 1s 2d; chloride and acetate dull. Nickel salts for plating 1s 6d@2s per lb.

Colors—Ochre: Oxfordshire, best £12@£13; Derbyshire, 45s@50s. French—J. C. 52s 6d@60s. Umber: Turkey, 60s. Devon 52s 6d. White lead, 20s@21s. Red lead, 18s 6d. Litharge 19s@19s 6d. Oxide of zinc, V. M. No. 1, 21s 6d; No. 2, 20s 6d. Venetian red, £4. Cobalt and Zaffres, no change.

LONDON & LIVERPOOL.

Under date of Nov. 12, 1880, Messrs. Arnott Bros & Co., say:

Ammonia in demand for both carb and sulph; arsenic steady; bleach higher for next year: brimstone in light supply; potash chlorate wanted for export; sodas are offering at low figures for present delivery with only a few contracts making; cloves in full supply and offering a shade lower; gambier sold for arrival to the extent of 150 tons at 17s 4d@17s 6d; lac dye in better demand; pimento dull; plumbago increasing in stock; shellac has declined 7s 6d and is still weak; nitrate is also weaker and forward delivery might be had at 13s 6d; cutch has arrived freely but is mostly of a soft Singapore grade; pepper to arrive 4¾d sold to the extent of 200 tons.

DYE MARKET.

The Dye Price List will be found in the Department of Prices Current following the Drug report.

TUESDAY EVE., Nov. 30, 1880.

There is some improvement to be noted in the jobbing trade in dyes and dyestuffs, but large parcels move off slowly, buyers' views in most instances being below what sellers care to accept. There is no upward movement to prices, but there is a steady feeling and few changes have occurred since we last wrote.

Bengal indigo is meeting with more attention, but buyers have little faith in the present position of the market and regulate their purchases to meet their current wants, anticipating further concessions on the part of sellers. There have been sales reported of 18 cases good medium at $1 30 and 5 cases at $1 25. We repeat our quotations of 90c@$1 10 for the low grades, $1 20@1 30 for medium to good and $1 35@1 60 for the better kinds. The first of the new crop of Guatemalas is beginning to arrive, but as yet we have heard of no sales. The market is rather easy, though no quotable change has occurred during the week. The range of prices is still 95c@$1 25 according to quality. We only hear of a few single ceroons sales of old crop at quotations. The soft kinds have not much more than a retail sale, but there seems to be a steady tone to the market and no change in prices is reported. We quote 70@75c for medium to good Manilas and Madras and 80c for best of both kinds.

Cochineal is unchanged. There is nothing worthy of note transpiring at the moment, and in the absence of business prices are nominal at 52½c for Honduras and Teneriffe blacks and 50@52½c for Honduras and Teneriffe silvers. On actual transactions these prices would probably be shaded a fraction.

Logwood remains easy under an accumulation of stocks and a lack of demand. Sales have been made of 220 tons Jamaica at $21, and 13 tons Pto Plata at a private price.

Fustic is dull and unchanged. We only hear of the sale of 16 tons on private terms.

Sicily sumac is selling slowly in a jobbing way at $85 for best. Large lots are obtainable at about $83, but these receive no attention.

Prussiate of potash is meeting with a fair sale in a jobbing way, but round lots are neglected. There have been sales of American yellow to the extent of 15 cks at 26@26½c, but large buyers could probably do better. Scotch yellow is quotable at the same price as the domestic article, but we do not hear of much selling. American red with a light jobbing demand is quoted at 58@60c, and these figures would be full prices for Scotch red.

Dutch madder is still quoted at a range of 8@10c according to quality. The demand is slow and is mostly for medium qualities, which are quotable at 9@9½c. Stocks are limited and no additions are expected for some time to come, the reserve in Holland being small. For French there is not much more than a retail demand to be noted, but prices are steady. Quotations remain 3½@5c according to quality a fair grade being offered at 4½c. Garancine is quoted at a range of from 7½@13c according to quality and quantity but these figures are almost entirely nominal, there being little or no demand.

Scotch bichromate of potash is in fair demand, but there is an easier tone to the market. There have been sales since our last issue of 25 cks at 11¼@11⅜c, these figures being the quotations at the close.

Cutch is more inquired for, but the sales for the most part seem to be of jobbing quantities. We have sales to report of 200 cases at 8c and 500 bales in lots at 8@8¼c. A sale of 1000 bales is also reported, but the particulars are withheld.

Gambier has been quiet but prices are well maintained, and nothing is obtainable in a jobbing way below 3⅞@4c. We have sales to report 3⅞c.

Albumen is selling quite fairly but there are not many large lots changing hands. The market is firm and prime domestic blood is not obtainable below 40@42½c, though some poor grades can be had at 37½c. Imported blood is quotable at a range of 40@45c as to grade and has a moderate call. Egg is still inactive, but is firmly held at 80@90c according to brand and quality.

Cudbear is selling fairly in a jobbing way and the market remains very firm at the prices given in our last. These are 12@17c for English and 12@45c for French according to strength.

Archill extract is still in good demand and prices are firmly sustained. We repeat our quotations of 13@18c for English as to quality and quantity.

Tin crystals are firm in sympathy with the metal. The demand is good and we have sales to report of 10,000 lbs at 17¾@18c.

Stannate of soda is held firmly at the prices given in our last, and the demand continues good. We quote 10c for single, 14c for double and 18c for extra concentrated.

Sago flour is quiet, but steady at 3@3¼c, at which prices we hear of sales of 150 bags.

Dyewood extracts have a fair demand but are not in active request. The market is somewhat irregular and sales are making below our quotations though the transactions are not made public. Our quotations for good goods remain 7@10c as to grade for logwood in bulk, 6@10c for liquid 51 deg. according to strength, 13@15c for fustic in bulk and 12@16c for 51 deg., 6@6½c for ordinary liquid 51 deg. sumac, 8½@9c for prime, and 15@15½c for paste.

Muriate of tin is in jobbing demand. The sales making bring 8c for single strength and 13½c for double, but large purchases of either kind can be made at less.

Oxymuriate of antimony is quiet and unchanged. Held firmly at 7c.

THE PETROLEUM MARKET.

TUESDAY EVE., Nov. 30, 1880.

Crude in bulk showed more strength just following our last, 94⅜c being the opening quotation on Wednesday, with sales at that figure. Later in the day it lost a point, and although occasionally reacting, closed at 93¾c bid. There was no business transacted on Thursday, and Friday's market opened at the closing prices of Wednesday, but lost, by gradua reductions, five points (3⅛c) during the day. On Saturday the ruling figure was 90⅝c, though there was a temporary gain of a point, and sales at 91¼c, at which the market finally closed, with a firmer feeling. Yesterday was stronger, 91⅞c being quoted at the opening, after which a point was lost, but this and another were subsequently recovered, and the market closed at 92½c. This was the opening price to-day, and the market has shown increased strength, the closing bid being 93¾c. The advance is purely speculative, and is probably made for the purpose of selling the market heavily. The quotaion for crude in bulk here is 4¼@4½c, and in bbls 6½@7⅞c. The latter for Parker oil.

Refined oil has been depressed throughout the week, and buyers have had things pretty much their own way, though few of them have taken advantage of the position. The "official" quotation, up to Saturday, was 10c, though oil might have been procured at ⅛@¼c less, while the extreme bid was 9½c, and that was offered very sparingly. Yesterday resales were procurable at 9⅛c and fresh oil could probably have been bought at the same figure, while to-day 9c would undoubtedly buy from refiners, but we hear of no bids. There is still a scarcity of oil tonnage and ocean rates are advanced somewhat, though this is more than offset by the decline in oil, and there is no hindranse to transactions except a lack of orders from the other side.

Cases are quoted at 12c for regular two-five low screw in lots of over 5,000. For lots of 1,000 up to 5,000 12¼c, for 200 to 1,000 12½c, and for lots under 200, 13c.

The difference in price between 150 and regular is 8c, while 120 is 1c, 130, 2c, and 135, 4c above regular, whether in cases or bbls.

The price of 300 oil was advanced on Monday 3c per gallon, and is now 33c, though this price can be shaded in some instances.

Gasoline and naphtha are both unchanged. The present quotations are as follows, the lowest figures being for 10 to 20 bbl lots and the highest for less than 5 bbls, gasoline 86 deg. 18@20c; 88 deg. 20@22c, 90 deg. 23@25c. Naphtha, crude 70 deg, 10¾; sweet 70 deg, 11½@13; do, 60 deg, 11½@13c; do, 76 deg, 12½@14c.

Empty barrels are still obtainable at $1 10.

FOREIGN REFINED QUOTATIONS.

	Antwerp.	Bremen.	London.
Wednesday	24⅝@	9 50	8⅝@
Thursday	Holiday		
Friday	24⅛@	9 25	8¼@8⅜
Saturday	24⅛@	9 30	8⅜@8½
Monday	23⅝@	9 05	8⅛@8¼
Tuesday	24¼@	9 10	8⅛@8¼

The charters for the week include 24,500 bbls and 115,500 cases refined and 4,800 bbls and 15,000 cases crude, a total crude equivalent of 84,613 bbls.

The average daily shipments from the regions for the past six days have been 31,968 bbls and for the month 34,877 bbls.

The exports from the United States to Nov. 20, are as follows:

FROM NEW YORK CITY.

	Gallons.
Week ending Nov. 20	3,499,415
Since January 1st	284,727,743
Same period last year	313,346,010
Decrease	28,618,267

TOTAL FROM UNITED STATES.

	Gallons.
Week ending Nov. 20	4,629,244
Since January 1st	374,501,013

The Standard Corners Franklin Heavy Oil.

The Franklin correspondent of the *Petroleum World* writes as follows: "The Standard Oil Company has bought up all the production of a number of our heavy oil producers for one year, paying them $3.75 a barrel. As soon as the arrangements were completed with all those who were willing to make a bargain of that kind, heavy oil shot up to $4.50 per barrel, and has a tendency to go still higher. Of course the Standard has nothing to do with this rise in heavy oil, but at the same time those who were foolish enough to make such a bargain are feeling just the least bit sore toward the company that gets the better of every man that it has ever dealt with. Thos. Brown, of Erie, A. M. McGregor and Henry H. Rogers, of New York, all officers of the Standard, were here in the interest of their company, and what new "grab" the Standard will make toward absorbing the little property and interests of outside parties who still dare to deal in the one important product of this region will no doubt be brought to light in a few days. The advanced price in heavy oil has given new life to developments in the vicinity, and the Standard may yet find difficulty in keeping heavy oil up to $5.00 per barrel, which price it is predicted it will reach in a few days. The territory that is attracting the most attention and presents the best prospects for speculators, lies southwest of Franklin, along the Pittsburg road. The Galena well (which belongs to the Standard) is due next Monday, and its completion is anxiously tooked forward to by numbers of parties that have been fortunate enough to secure a lease from some of the farmers in that direction. Dr. Egbert intends putting up a rig immediately, just this side of the reservoir, and cleaning out an old hole. The well on Plumer Hill that came in last month and was reported at four barrels, is believed by many to be doing seven or eight barrels. The belt is believed by some to extend to Sandycreek, where the Pittsburgh road crosses the creek. There were several wells sunk near this crossing in '65, but the managers at that time were quite green at the business and only one well was sunk to the required depth, and from this hole there were many barrels of oil dipped every spring when the water forced it to the surface. Should this be the direction of the belt, Wm. Parker and others that are putting up a rig on the Brashear tract, about a mile and a half to the front, will be very close to the line. The farmers in that direction are not yet wide awake, and several good leases have been made this week.

OIL MARKET.

The Oil Price List will be found in the Department of Prices Current following the Drug report.

TUESDAY EVE., Nov. 30, 1880.

The demand for nearly all kinds of oils has been very good, but there is little speculative interest manifested even in those oils that are usually largely operated in. The firmness with which the comparatively high prices for lard oil are maintained lends a confident tone to the market for most of the animal and vegetable oils. In both crude and refined cottonseed oil there is little of interest transpiring, but there is a firm feeling induced by small stocks, and higher prices are confidently looked for. The market for linseed oil is unsettled, and prices have a drooping tendency. Menhaden oil is in a peculiar position. Pressers obstinately refuse to raise their bids, and, being pretty well supplied, are in a position where they can afford to be indifferent. Cod oil is easier. Cuban and Ceylon cocoanut oils are now firmer. In the mineral oils there is an upward tendency to prices. 300 degree oil was advanced yesterday to 33c, but can still be bought at less. Oil cake is lower. Domestic flax seed has declined in Chicago, but is unchanged here. Calcutta linseed is higher.

Linseed oil is in fair demand for consumption and though the individual sales are not large the aggregate is, and stocks are not accumulating. There is an active demand for future delivery, and slight concessions on the part of crushers would lead to large sales. We do not hear of any spot sales below 55c, and that price is being paid for the jobbing quantities moving. It is reported that 54½c would be accepted, but we do not find the seller. We know of 54c being refused for City oil for forward delivery, but on the other hand large contracts have been made within a few days for State, and possibly some City, at between 53½ and 54c. There seems to be very little oil in the hands of City crushers, and Western stocks do not appear to be accumulating at all rapidly. There are very few barrels here and the holders ask 55c, though it is reported that the price in the West has been reduced to 53c. Calcutta oil is stiff at 60c.

Mustard seed oil is offered by the largest holder at 65c and we hear of nothing to be had at less. There is some demand, but it is for retail quantities.

Rape seed oil is offering at 90c, but this price would probably be shaded. Jobbing sales are making at 95c@$1 10.

Manufactured whale oil is held steadily in sympathy with lard oil. There is a fair jobbing trade in progress, but with a slight concession from the ruling rates an increased business could be done. We repeat our quotations of 56c for natural winter, 58@59c for bleached winter, and 60@61c for double bleached.

Previous to our last there was a sale in this market of a lot of 200 bbls crude sperm for export, but the terms were not disclosed. The manufactured sperm oils are meeting with a fair jobbing sale at $1 12@1 15 for natural and $1 17@1 20 for bleached winter. Manufactured elephant oil is selling moderately at 65c for natural and 68@70c for bleached winter. There is no crude in stock and none expected until after the turn of the year.

Lard oil, nothwithstanding an easier market for lard, has experienced a sharp advance. This is accounted for by the fact that a large advance has occurred in the price of pork at Chicago. Early in the week there was a slight tendency to decline in the price of oil, but with the news of the advance in the West the market immediately stiffened up, and the price rose to 73@75c, at which figures the market closes. There is a very good jobbing trade in progress notwithstanding the high prices, but the export trade has been entirely checked, the ruling being 10c above shippers' views. The low grades have not been influenced by the increase in the cost of prime, to the extent that was naturally to be expected. Extra No 1 oil is quoted at a wider range, but the utside figures are difficult to realize except on choice oil in small quantities. We quote 65@70c. For No 1 oil 57½@63c would be full quotations. No. 2 oil is held at 47½c by some makers, but purchases could readily be effected at 43@45c and possibly less. There is very little of the two latter grades changing hands at the moment.

Crude cottonseed oil is beginning to accumulate on the spot, but as yet there is not a large supply. The principal holder is not offering his stock, preferring to store it and wait until buyers increase their bids. The only trade in progress is in small lots, and these bring 36@37c, but it is doubtful if large sales would be made at less than 35c, and some holders would not entertain bids lower than 36c. In soapstock there is a fair trade in progress but the sales are not of large quantities. About 200 bbls at 2@2¼c have been sold during the week, and these figures about represent the views of holders.

Summer yellow cotton seed oil is not moving in a large way, the lack of supplies restricting business. The only transaction worthy of note was a contract for 200 bbls at 45c for deliveries in small lots. Offers, it is reported, have been made to sell prime oil at 42½c, but we heard of no sales at this, and it is doubtful if buyers would pay better than 41c, if as much, for a large quantity at the moment The lots moving bring 44@46c as to quantity.

Winter oils are steady at the prices given in our last. Lower figures have failed to stimulate the demand and there is not much moving. We quote 50½@51c for yellow and 52@52½c for white.

Crude menhaden oil is not wanted by pressers, who have sufficient stocks to last for some time to come, if not until spring. This, together with the dullness of the market for manufactured, renders them indifferent, and sales could not be effected except at a considerable decline from present rates. There have been sales of 400 bbls Southern on private terms, supposed to be about 38c. Sellers of Sound oil want 41@43c, according to quality. Manufactured oils are rather easier under a light demand. We note sales of 60 bbls light pressed at 44½c, but a large lot could be had at ½c less. Some makers want 46c. Dark pressed is quoted at 43@44c, but is not wanted. Bleached is a trifle lower, being now quoted at 49c. Occasionally small sales are still made at 50c. Bank is offered at 42@44c, without finding buyers, and straits is obtainable at 44@45c.

Cod oil has arrived quite freely and coming on a dull market the result has been a general weakening of prices, which in some quarters has been quite marked. Domestic has been offered by outside holders as low as 42c, and sales would readily be made by regular sellers at 44@45c. In English there has been some movement, but the aggregated sales were not large. We notice sales of 150 bbls at 46c, and from this up to 48c are now the quotations.

Palm oil of choice quality is scarce in Boston, and held firmly for 6¾@7c. There have been sales there of 50,000 lbs inferior at a fraction under 6c. This leaves a very small stock. On the spot, the cargo of the "Monrovia," some 150 tons, has been nearly all sold at a price not named.

Ceylon cocoanut oil is firmer, and in a jobbing way sellers are now able to realize 7@7¼c. The stock has not been materially reduced of late, but it is in stronger hands. The demand is quite active, but no large lots are changing hands. Of Cuban there have been sales of 160 bbls at private prices, supposed to be about 6¾@6⅞c. Holders now ask 7@7¼c for jobbing parcels. Cochin is jobbing at 9c, but round lots could be bought at least ¼c less. We quote sales of 6,000 lbs at 9c.

Olive oil is quoted by one holder at 95c but most sellers want $1. This would not be paid for a large lot, and the only business reported is of a jobbing nature. Sales have been made of 35 bbls in lots at $1@1 02½.

Red oil saponifid is still scarce and held with much firmness at 47½@48½c for California and Western respectively. We get sales of 50 bbls at 47½@48½c. City, with a light trade, is held at 50c. Elaine is very firm at 49@50c.

Paraffine oils are in very good demand for the season, and the general tendency is toward higher prices. There are very few outside lots, and these are offered at such a slight concession from the regular rates as to offer no inducements to buyers.

Black oils are in the same position as last reported. Nothing is offering from outside sources, and we have not heard of an instance where our quotations have been undersold. The price demanded for zero is 19@20c; for 15 cold test, 17c, and for 30, of which there is little offering, 15½c. Summer reduced is offered at 12½c. The demand for all descriptions is very good.

—:o:—

OIL CAKE.

High freight and a lack of interest on the part of foreign buyers have a depressing influence on this market, and lower prices would be accepted. Western bag could be bought at $30 50, but buyers' views are fully $1 per ton less, and nothing of importance has taken place. City crushers want $31 50, but would probably sell at 50c less. There is no Calcutta cake offering. Nothing is reported in cotton cake, and there have been no receipts.

—:o:—

SEEDS.

There has been a sale of 2000 bags Calcutta seed at $2 05 net cash. Further parcels are offered at $2 10 (4 months'), but it is thought that a bid of $2 07½ would obtain a lot. The past week has been a quiet one in the Chicago flaxseed market. Early in the week sales were made at $1 17@1 18, but the close was rather easy at $1 16 with little business reported. There have been no sales on the spot, and we quote nominally $1 47½.

—:o:—

LARD.

Three has been less business since our last report and the market is somewhat easier. The arrival of hogs at the West being quite free, their influence has been felt both at that point and here, resulting in a slight break in prices. Western on spot is now quoted at 9c, 8 92½c for December, 8 95c February, 9 02½c March, 9 10c sellers' option, six months, 8 92½@8 95c year. City is doing fairly and transactions are reported at 8 90c. Stearine is dull and the market is not so steady, with Western to be had at 9¼@9 5-16c, while choice is quoted at 9⅝c.

TALLOW.

The market continues steady and business is fair. The inquiry has been more active for export, while a steady movement is noted for home wants. Prices are unchanged and we quote 6⅜@6½c for ordinary and 6½@6⅝c for choice.

—:o:—

NAVAL STORES.

The intervention of a holiday has not affected this market as much as some of the others. There was a lack of demand during the early part of the week, and an irregular tone to the market, owing to discouraging accounts from the Southern and foreign markets. On Wednesday and Friday small sales were made at 45@46c, but on Saturday the market stiffened up, and less than the outside price would not have been accepted. Yesterday there was nothing doing, and to-day there was more inclination shown by sellers to meet buyers' views. No quotable change took place, but it would not have been difficult to make purchases at a shade below 46c. We hear that spirits in cases was offered to-day by speculators at 48c.

Rosins have been quiet during the entire week, but the market has been steady, especially for the lower grades.

Pitch is steadily held at $2 05@2 10, but there is not much doing.

Tar is easier, being now quoted at $3 75@4.

New Bedford Oil Market.

NEW BEDFORD, Nov. 29, 1880.

The crude sperm oil market has been very dull the past week, and we are without a single transaction to report. The price is nominally 98c, but in the absence of transactions there is no quotable price.

The crude whale oil market has also been very dull the past week, and we are without a single transaction to report in this market. The holders of whale oil are very firm, and prices are not materially changed from the last quotation.

REPORTS FROM WHALERS

Bk Adeline Gibbs, at sea Apl 18, taken 1 whale.
Bk Cicero, at sea June 15, 30 sp.
Bk F B Phillips, Teneriffe Oct 23, with 115 sperm shipped to New York per Nellie.
Schr C W Clark, at sea, Feb 4, nothing this season
Bk Triton, Monoganrie Oct 1, with 150 bbls sperm since last report.
Bk Matilda Sears, Tumbez, Oct 10, with bbls sperm 130 hp. last cruise; still cruising.
Linda Stewart, Payta, Oct 18, with 340 bbls since August; still cruising.
Bk Platina, at sea, (no date).
Bk Lydia, St Michaels, May 28, no report.
Schr Emma Jane, at sea June 1, with 250 bbls sperm
Schr Surprise, at sea Nov 17, with 50 bbls sperm
Bk Petrel, New Bedford June 19, with 1200 bbls sp. and 25 bbls whale. Sent home on voyage 620 sp.

Manufacturing Co.

Office, 99 Maiden Lane, N. Y.

G.P.W. M'F'G CO. N.Y. TRADE MARK

Griffiths' Patent White has been in use in England and on the Continent for several years, acquiring a high reputation as a Pigment.

It has 20 to 25 per cent *more body and covering power* than the very best White lead.

It is *far whiter* than *White Lead* and not injured by foul gases, nor by exclusion of light.

It works *very freely* under the brush, thereby saving much *time and Labor.*

It is entirely *non-poisonous* and *absolutely harmless* to those working with it.

It is highly approved by *all practical painters* using it, whose *testimonials* can be seen at our office. In order to facilitate trials of the

"GRIFFITHS' PATENT WHITE"

Sample Cans containing 8 lbs., ready mixed for use, will be sent by express to any address in the United States, Canada &c., on receipt of one dollar each.

Turpentine as a Dryer.

In answering the self-propounded question, "What are Dryers?" the London *Oil and Colorman's Journal*, gives some facts concerning the use of turpentine in paint, which, if not entirely new, are clear upon the points which they undertake to explain. We scarcely agree with its idea that its statements "will shock the ideas of most people, because there is an almost universal opinion that turpentine helps to dry paint and varnish." When turpentine is added to paint or varnish it is simply a vehicle which makes them thinner, more easy to work, and, of course, the work dries quicker than the same paint or varnish would have done without it, but it does not act as a dryer. Any one sceptical should take a perfectly clean piece of glass—say about twelve inches long by six or eight broad—and spread thereon, with a new or clean brush, for not quite half its length, a film of vegetable black mixed with boiled linseed oil, without any dryers or turpentine, so as to be almost opaque when the glass is held up to the light, and then to the remainder of the black so mixed add as much turpentine as possible, and lay on this diluted paint with the same brush on the other end of the glass, until it is as opaque as the first, leaving, say, a division of about an inch unpainted between the two to prevent them mixing. Then, to see how much quicker a thin coat dries than a thick one, scrape off a part of each with a palette knife, leaving each as nearly and as equally transparent as possible. The thin coats will be found to be dry in three or four days, whilst the thick will take about a fortnight. Of the two thicker coats the one without turpentine will dry quite as soon, if not sooner, than that which has been mixed with it. Turpentine necessarily contains a certain percentage of resin in its composition. Every painter knows resin is injurious to the drying properties of linseed oil. Turpentine, after the evaporation of its volatile part, has done its office, but leaves the resin behind in the paint, so that its ultimate hardening is spoiled more and more in proportion to the quantity of turpentine that has been used. In proof of this, let anyone expose to the open air in a vessel, of say ten inches in diameter, a pint of turpentine, he will find it evaporate about one-eighth of an inch in the first twenty-four hours, a little less the second day, and gradually less and less each day thereafter, until in about three weeks he will find all the turpentine spirit evaporated, leaving a slimy resinous non-drying substance, which will take months to harden, but which by artificial heat he will find to be resin. Therefore turpentine is not a dryer, but simply a vehicle to make paint thin, leaving a non-drying substance behind it.

Cobalt and its Oxides.

The word cobalt is supposed to be a modification of "Kobald," a name given to certain mythical beings, who, the superstitious miners supposed resisted all efforts to get at their secrets and mysteries by throwing all sorts of obstacles in the way of the searchers. Hence, when the miners in digging for precious metals, found in their place, what to them were worthless ores they immediately ascribed their appearance in that locality to the evil genii or Kobalds. Thus the bright shiny mineral, with which they met frequently, and which they deemed useless, obtained the name of Kobald or cobalt, under which it has ever since been known.

The best known varieties of this mineral are smaltine or cobalt-speiss, cobalt glance cobalt bloom and earthy cobalt. The oxides and salts of cobalt are of rich and beautiful colors and from early times have been used as pigments. These are red, blue, yellow and green.

The first is obtained by precipitating cobalt with phosphate of soda, which yield a red violet color, varying in shade according to the temperature at which is is prepared. By calcining a mixture of sulphate of cobalt, ammonia and iron a fine cobalt brown is produced.

By fusing impure protoxide of cobalt with silica and carbonate of potassa, an intensely blue colored glass is formed which, when powdered, is known as smalt. It was first discovered in the sixteenth century by a Bohemian glass-blower. Smalt is now produced by melting roasted cobalt ores with quartzose sand and potash in crucibles placed in a glass furnace. The glass thus formed is cooled in water, which renders it brittle, after which it is pulverized and then scoured with water, by which operation different degrees of fineness (both as regards minuteness of division and depth of color) are obtained. The color is very fast, as it is not affected by the atmosphere, or by acids or other liquids.

At one time smalt was largely used by paper makers and in the laundry, but since artificial ultramarine has been produced on such a large scale its use has greatly diminished, artificial ultramarine being by far the cheaper of the two. The most extensive use to which smalt is now put is in blue enamelling glass, porcelain, and earthenware.

A pigment consisting of alumina and protoxide of cobalt is known as Thenard's blue or cobalt ultramarine. It is prepared either by mixing solutions of alum and a salt of protoxide of cobalt, precipitating the mixture by a solution of carbonate of soda, or by the decomposition of aluminate of soda by means of chloride of cobalt. The resulting precipitate consists of an intimate mixture of hydrate of alumina and hydrate of protoxide of cobalt, and is first washed well, then dried and heated for some time. When the pigment thus produced is pulverized and exposed to the daylight, it is very similar to ultramarine (from lapis lazuli), but when seen by artificial light it presents a dirty violet color. It is not acted upon by acids, nor is it affected by alkalies or heat, as is copper or mineral blues. Thenard's blue is used as a paint either in water or oil, and it is also employed for staining glass and porcelain.

Another blue is obtained from this metal, which consists of stannate of peroxide of cobalt, mixed with stannic acid and gypsum in the proportions o 49.6 parts of oxide of tin 18.6 of protoxide of cobalt and 31.8 of gypsum. It is of a bright blue color not changing in artificial light and it is not affected by heat or the action of diluted acids and alkalies, though nitric acid dissolves the protoxide of cobalt, leaving the other ingredients, from which the gypsum can be cleared by water. This color is known as cæruleum and is an English product.

Rinmann's green, which is also known as cobalt green, Saxony green and zinc green is a compound somewhat similar to Thenard's blue; the difference being that in place of alumina, oxide of zinc is used. It is prepared by mixing a solution of white vitriol with a solution of a salt of protoxide of cobalt, precipitating by carbonate of soda. The precipitate is washed and dried and then heated, the result being a beautiful green pigment. This, when pure, contains 88 per cent of oxide of zinc and 12 per cent of protoxide of cobalt. It is not affected by strong heat, but dissolves in warm hydrochloric acid, forming a blue color, which upon the addition of water becomes a pale red. The oxide of zinc is dissolved when the pigment is treated with caustic potash, and may be detected, after previous dilution with water, by the addition of a solution of sulphuret of potassium. A beautiful yellow pigment is obtained from cobalt by mixing nitrate of potassium with a solution of protoxide of this metal. Thus a double nitrate of cobalt and potassa is formed, which on precipitation yields a yellow crystalline body perfectly insoluble in water. On account of its great cost, however, this pigment is not available to the painter except for the finest work. There is still another color obtained from cobalt, which is very little known. This substance is cobalt bronze, a violet colored powder, much resembling the violet colored chloride of chromium, and exhibits a strong metallic lustre. It is prepared by Pfannenstiel, in Saxony, and was only brought to the attention of painters a few years since.

PAINT MARKET.

The Paint Price List will be found in the Department of Prices Current following the Drug report.

TUESDAY EVE., Nov. 30, 1880.

Business in all lines of paints and colors is not calculated to cause enthusiasm among manufacturers and dealers. The heaviest consumers and the largest retailers have completed their supplies for the winter, and for the next month or two trade will be confined to narrow limits. In the meantime manufacturers and dealers will take account of their stocks. There have been few fluctuations in values during the past week that are worthy of note. On most of the heavy goods there is an easy feeling, but the fine colors are steady and such articles as quicksilver vermilion, carmine and fine blues are very firm. Glass is firm, especially French and American plate, of which there are very light stocks. Varnish gums are firm throughout, the advancing tendency to the prices for Manila being still a marked feature of this market. Shellac has again declined, owing to weaker foreign advices and prospective large stocks.

Pig lead is rather weak and the market is dull. Small sales of common are making at 4 75@4 80c, a decline from last week's quotations.

White lead is unchanged. Cutting of rates continues, but the amount of business consummated is light. It is reported that Western lead ground in oil is selling at 7c in the West. The meeting of the Eastern corroders announced for yesterday has been postponed until Thursday next. There are no new features. It has not been settled in advance what action should be taken, but the chances seem to be very remote for a renewal of the combination by the Eastern corroders, although they are being urged by many of their customers to mantain the Association under all circumstances.

American oxide of zinc has a fair steady sale in small quantities and some sales could be made for future delivery, but the views of the would-be buyers are below what oxidizers care to accept. The sales making bring 4½@4¾c for best according to maker and quantity, and the low grades, of which there is little selling, command 4⅛@4¼c, though we occasionally hear of sales of very poor quality at 4c. In French there is nothing of interest transpiring. A few jobbing sales are making but nothing in a large way is reported. Prices are unchanged and steady. We continue our quotations of 8¾c for 50 bbl lots of Paris green seal, 9c for 10 bbl lots and 9¼c for less; 7¼c for 50 bbl lots of Paris red seal, 7½c for 10 bbl lots and 7¾c for less; 7c for 50 bbl lots of Antwerp red seal, 7⅛c for 10 bbl lots, and 7¼c for a smaller quantity.

Sulphate of barytes is meeting with little attention. Buyers are taking little or nothing and quotations remain nominal. Sellers of domestic prime white ask $24@25, but purchases could no doubt be made at much less than the inside price. Imported is in about the same position as domestic; the market is dull and the quotation nominally $25, but we have heard of sales at less, and for a round lot this could not be realized. Off colored grades of domestic are still quotable at $14@18, but there is nothing doing so far as we can learn.

Chalk is higher. The difficulty of obtaining freight room on the other side checks shipment, and as there is not much on the way unsold, sellers have advanced their views. There have been sales during the week of 1,000 tons at $1 90.

Whiting is dull. Manufacturers are doing little beyond filling contracts made early in the year, and now that the close of navigation is so near at hand it is hardly probable that any new engagements will be entered into, except possibly by a few local dealers or consumers. There is a firm tone to the market and no change in the Association's prices has been made since our last. We repeat our quotations of 65c for commercial, 80c for gilders and 90c for extra gilders, less the regular rebates and discounts.

Paris white remains in the same position as at the date of last writing. There is a moderate jobbing trade in progress, but largest sales rarely exceed lots of 10 tons. Prices of well established brands are firmly sustained, and for these the quotations remain $1 20@1 25 in large lots and $1 30@1 50 in smaller quantities, but there are makes on the market that can be had as low as $1 15, and we hear it intimated that $1 10 will buy some poor grades. American Paris white is still without animation. Sellers get 95c@$1 in a small way, but a large quantity could no doubt be obtained at 90c.

English china clay is moving off slowly in small lots, but there seems to be no anxiety on the part of importers to force sales and the market remains steady. There are some lots, recently imported, that can be bought below our quotations, but the quality is said to be below medium, and they do not meet with much attention. The stock on the spot is light, and there having been no inducements to import by steamer, it will be some time before the lots shipped by sail will be available. The quotations given in our last are still current. These are $17 50@18 for medium to good from store and $16 50@17 to arrive. Sales have been made of 30 tons in lots at $17 50@18 ex store. Superfine is quotable

NEW-YORK

BARYTES.

The Southern Coal, Iron and Land Co., L'd, are prepared to sell or lease their Barytes mills at Whitwell, Coche County, Tenn. together with mining privileges, upon their estate at nominal royalty. The recent daily output of the mill has been five tons of water floated barytes and the power would enable this to be doubled. The supply of ore is liberal and mining privileges can be given extending over 100,000 acres. The reason for discontinuing business by present owners is multiplicity of other business engagements and distance of this property from headquarters. For full information apply to the Southern States Coal, Iron and Land Co., L'd., South Pittsburg, Tenn.

at $20 50 to arrive and $21 50@23 ex store, as to quantity and quality. We hear of no sales. For domestic there is a moderate inquiry, which is met at $12 for white Southern and $10@11 for Brandon and other kinds.

English terra alba is offered at 95c per cwt ex dock to arrive and 1c per lb from store. There is a light demand and only jobbing sales are reported. For French a wide range of prices is quoted, though the low selling seems to be confined to one importer. The general quotations are 1c per lb from store and 90@95c to arrive, but the the seller indicated will accept less. American is quiet and unchanged. No. 1 is quoted nominally at $15 per ton to dealers by the manufacturers, and the former quote 80@85c per cwt to consumers, but it is probable that sales in a large way would be made for less. For No. 2 the nominal quotations remain $8 per ton to dealers and 45@50c to consumers.

French talc is without animation. A light jobbing trade is in progress, but there are no large lots changing hands. The lots selling bring 1¼@1½c, but large quantities are obtainable at 1⅛c and possibly less.

Paris green is dull and unchanged. There is some demand for green in pulp, but dry is not wanted. We quote the latter at 16@20c as to quality and color, a good grade being obtainable at 18@19c.

English cobalt is selling moderately well in 10 and 20 lb lots, but there is no call for any larger lots. Sales have been made of 50 lbs at $3 and 75 lbs at $3@3 10. For German $2 75 would be a full price, it being intimated that sales have been made at less.

Prussian blue is in fair request, but there is not as much doing as a week or two since. Prices are steady but no higher, and we continue our quotations of 45@55c for pure as to brand, and 30@50c for the poorer kinds.

Chinese blue (pure) is readily obtainable at 55c, though some manufacturers want 65c. There is a steady tone to the market, but no probability of an immediate advance. The demand is moderately active, sales being mostly in a jobbing way.

Quicksilver vermilion is not claiming much attention, the only demand reported being of a jobbing character. The market is firm but unchanged and we continue our quotations of 57½c for lots of less than 500 lbs, in 30 and 50 lb bgs, 55c for 500 lbs and over in 30 and 50 lb bgs and 1c per lb less in bulk packages of 100 lbs or more.

American vermilion is still irregular in price, quotations ranging from 11¾@12½c according to color and make. A pure scarlet is obtainable at 12@12¼c. The demand is light and we have no important transactions to report.

Carmine is steadily held at the prices that have been ruling for some time past and no change is contemplated by manufacturers. The demand is of a jobbing nature, the largest sale we heard of being a lot of 25 lbs at $6. We still quote $6 for lots of 25 lbs and over and $6 25 for a smaller quantity.

Venetian red is quiet at the moment and prices are unchanged. English is jobbing from store at $1 40@1 45 as to brand. Cookson's is still offered at $1 42½ to arrive and $1 45 from store. In domestic there is nothing new to report and prices remain as last quoted, viz., $1 20@1 25 as to brand and quantity for best, and 87½c for a poorer grade. We have sales to report of 200 bbls English from store at $1 40@1 45 and 150 bbls domestic at $1 25.

Red lead is still held at 6@6¼c as to quantity but there is not much doing. We hear of sales of 10 tons at the inside price.

Litharge is actively inquired for, but there is a lack of stock for prompt delivery and the sales closed are mostly for future delivery. The market is very firm at 6@6¼c, at which we are reported sales of 60 tons.

Indian red is not selling to any extent. English is still quotable at 3½@6c as to color and quantity and domestic at 1¼@3½c as to quantity and brand.

Orange mineral is almost entirely nominal in price, buyers taking very small lots as their immediate wants require. There is no change to be noted in prices. The

quotations for domestic still stand at 8¾@9c in a jobbing way and 8½c for large lots. These prices might also be quoted for English. German is held at 10@10½c as to quantity, but we think a close buyer could do better. There is nothing doing in French and the stock, both on the spot and to arrive, is light. We quote 12@12¼c to arrive and about ¼c advance on the outside price for spot lots.

French ochre is dull and no changes in prices have occurred for some time past. Full quotations are $1 15 for G M B to arrive and $1 15@1 20 for the same from store; $1 30 for N M B to arrive and $1 35 for store lots. Domestic is selling moderately well at unchanged prices. We have sales to report of 47 bbls single washed at 1¼c and 28 double at 1⅝@1¾c.

Glues remain quiet, but as there have been no additions to the stock in this market, holders are very firm at 7½@10c for the low grades, 11@13c for medium, 15@24c for white, and 27@35 for extra white.

Window glass is selling fairly but the demand is not as active as during the past few weeks. Dealers in French still allow a discount of 50 per cent, but a greater discount would probably be given on a large purchase. Holders of American are very firm in their views, and the largest discounts allowed are 60 and 5 to 60 and 10 per cent.

Plate glass has a fair sale but the quantities changing hands are not large individually. There is a good supply of English, but French and American are scaece. The discounts are 40 and 10 per cent on French, 50 per cent on English and 50 and 5 per cent on American.

Varnish gums are very firm and to prices for some descriptions there is a decidedly upward tendency. This is particularly true of Manila copal, which is in small stock and is well controlled. There is no possibility of any large receipts for some time to come, and only one invoice is known to be on the way. There is considerable inquiry, buyers showing more inclination to meet the views of sellers and since our last report there have been sales made of 500 cs at 13c cash and 600 cs part at 13½c. These prices would not now buy, the market closing firm at 14@18c as to quality. Singapore damar is very scarce, and though there is a lack of important demand, holders are very firm at 23c. There is a comparatively small stock of Batavia which is offered at 22@25c, though it is doubtful if the inside price would be accepted except on a round lot. Kauri is quoted at 50c for choice selected, 20@40c for chiseled and 12@15c for scraped. There is a good demand but the sales are not reported.

Varnishes are selling only in such quantities as consumers and dealers require for their immediate necessities. The firm tone of the gum market and the high prices ruling for turpentine keep prices stiff for prime goods. We quote $1 10@1 25 for Kauri furniture and $1@1 10 for Manila, but it is understood that some makes of poorer grades are obtainable at less.

Metal leaf has been quite active of late at $1 25@$3 per pack as to quality.

Gold leaf is quiet at $7 per pack based on XX.

Metallic paints are selling moderately well at unchanged prices. We quote $20@25 per ton as to brand for carload lots, $22 50@26 for 5 tons and $25@28 in single ton lots. In oil, makers get 5@6½c as to brand and quantity.

Putty is still active and manufacturers have not yet been able to catch up with their orders. The scarcity keeps prices steady at 1½@1¾c in bulk as to make, 2¼@2½c in bladders, and 2½@3c in tins.

CHEMICAL MARKET.

The Chemical Price List will be found in the Department of Prices Current following he Drug report.

TUESDAY EVE., Nov. 30, 1880.

There has not been any activity in this market during the week, but a fair inquiry is reported for small parcels. The market, however, is in rather better shape owing to the light arrivals and the small parcels that are offering. Bleach has been in some demand for next year and sal soda has sold rather more freely for arrival, but other descriptions have been taken only in small lots. Buyers continue to offer lower prices but there is less disposition being shown to accept them.

Carbonate d ash, 48 per cent, has been in rather more demand, and there is a steady tone to prices. There is nothing now to be had below 1½c, and this will not be accepted for all brands, 1 55c being asked, while for small lots from store 1 55@1 60c are the figures. High test is in rather better shape and sellers are firmer. Some brands are held at 1 57½c, but 1 55c was accepted for 50 tons, and this price has been bid for 50 tons more of the same brand. There are other descriptions which can be had at 1½c in lots, and this was paid for 250 tons. We also heard of 225 tons both kinds at 1½@1 56¼c as to quantity. Newcastle ash has sold in small parcels at 1½@1 55c.

Alkali is also a shade firmer, and we do not hear of any 36 per cent to be had below 1 45c, while 1½c is quoted for some brands. Refined has not changed and is still to be had at 1 70c@1¾c. The sales are 100 cks both kinds.

Caustic ash 48 per cent has not been taken to any extent and the market is weak. There is a full supply, and this has the effect of keeping prices low. There are sellers who are quoting 1½c, and this has been accepted for 150 tons, while 1 55c has been paid for a few small parcels. High test is also weak in tone and parcels can readily be obtained at 1½@1 55c, while one seller is quoting 1 45@1½c. Sales are reported of 100 tons at 1½c and a few jobbing parcels at 1 52½c.

Caustic soda 60 per cent has not changed in price, though the market seems to be a shade steadier; 3 60c is the lowest that will be accepted, with bids in market of 3½@3 55c. There are some sellers who will not quote less than 3⅝c, and this has been paid for 200 dms. We hear of 90 dms at 3 60c and 100 dms at 3 65c. High test is moving quite freely for the season and prices are steady at 3 30@3 35c as to brand. There have been sales of 100 dms at 3 30c, 150 dms at 3 32½c, and 100 dms in lots at 3 35c, with bids of 3¼c declined. Seventy-six per cent is quoted at 3¾@4c as to quantity, with sales of 25 dms at the lower figure.

Sal soda has become scarce again on spot and with but little to be had at the moment sellers are quoting 1 20@1¼c with sales of 50 tons in lots at both figures. To arrive for near at hand parcels 1 15c is the lowest we hear named, while for early December shipment 1⅛c is quoted. For shipment same month, vessel not named, there have been sales to the extent of 600 tons at 1 07½c, but this will not be accepted now, and 1 10c is the best that will be taken. We hear of other sales of 50 tons at 1 10@1 20c, and 50 cks in lots from store at 1 20c.

Bleach is doing better and with but little pressing, sellers are firmer, and though some lots of Johnson's are still obtainable at 1 10c, other brands are held higher and we do not hear of anything offering below 1 15@1 20c as to brand. The transactions are 50 cks at 1 10c, 100 cks at 1 20c, 200 cks at 1 10@1 3-16c, various kinds. There have been some sales on contract over all next year, some 600 tons being placed. The price paid was 1 35c. There have also been a few small transactions for jobbing wants at 1¼c, the sales footing up 45 casks.

Salt cake has not changed and is still quoted at 95c.

Acetic acid is meeting with the usual demand for the season. The market is steady, but prices vary according to quality. There have been sales since our last of 25,000 lbs at 3⅛@3¼c, and 10,000 lbs 3@3⅛c. For chemically pure a fair demand is noticeable, and the market remains firm at 7@10c, the outside price being for U S P.

Arsenic has again advanced, and we have now to quote 2⅝c for Drayton's, and 2⅞c for Garlands. The higher prices restrict the demand, and we find little doing.

Blue vitriol is held firmly at 7⅜@7¾c for medium to best grades but poorer qualities are obtainable at 7⅛@7¼c. We have sales to report of 50 bbls at 7⅜@7¾c. The demand is light.

Brimstone has arrived quite freely since the date of our last, but the invoices were mostly sold before arrival, and very little comes on the market. There has been considerable inquiry the past few days, and sales have been made of 300 tons seconds at $33, to go to Baltimore, and 200 tons seconds at $33 for home use. In addition there have been sales of 700 tons thirds to arrive, but we are without further particulars. We quote $33 for seconds and $31 for thirds, but these prices might be shaded, we think.

Cream tartar is still in fair demand, but there is no speculative interest, and the market lacks strength. The quoted prices are 30@31c for crystals, but we think these prices would be shaded on a large lot. For powdered the quotations are 32c in bbls, and 32½c in boxes. There have been sales since our last of 20 cks crytals at 30½@31c, and 125 bbls powdered at 32c.

English bicarb soda is still without animation and prices are almost entirely nominal at 3¾@3 90c. Sales are reported of 100 kegs at 3⅞@3 90c. Domestic is still quotable at 2¾@3c, but we do not learn of much doing.

English chlorate of potash has received more attention, but the market is still far from active and an easy feeling prevails. Sales have been made of 50 kegs at 15¾@16c, and at these prices the market closes.

Fertilizing chemicals of all kinds are scarce. The market for muriate of potash is unsettled owing to the offerings of outside lots, but stock could not be laid down here at the prices accepted for such parcels and importers are very firm at $1 65 for lots to arrive and $1 70@1 75 for spot lots. We hear of a sale of 50 tons at $1 60 on the spot. Kainit is also firmly held under light stocks and a fair demand. We note sales of 300 tons December shipment at $7. We quote shipments at $7@7 25 as to date of sailing and spot lots at $7 50@8. Kieserite is not in much demand, but cannot be bought at less than $6 50, duty paid, and $5 75 in bond. Azotine and dried blood are still scarce and with a fair demand are strongly held at $3. Bones are quotable at $21@22 for rough and $28@30 for ground. Bone black is higher, being now quoted at $26@27 as to quality. Sulphate of ammonia has sold to the extent of 50 tons at 4⅛@4¼c, and these were the quoted figures at the close, the market being very firm.

Nitrate of soda, since the sales mentioned in our last, has recovered somewhat, and a healthier tone prevails, though the market is not quotably higher. The demand is good and sales have been made of 1500 bgs at 3⅜@3½c. Cables from London report a good business at a slight advance on previous rates.

Oxalic acid is dull and unchanged. Small sales only are making at 8c.

Sal ammoniac brings 11½c in a small way. There is a moderate trade in progress.

Saltpetre has been more active the past week and sales have been made of 2500 bgs from two vessels just arrived at 5⅞c. The jobbing demand has also been good and we have sales to report of 500 bgs in lots at 6@6¼c.

White sugar of lead is not offered by manufacturers below 15c, and as the stock in second hand is becoming very light, these holders are refusing to accept less than 14¾c. The quotation of 14c given in our last was a typographical error and should have been 14½c. This price would not now buy.

Brown sugar of lead is scarce and firm at 10c for lots of 5000 lbs and over, and 10½c for smaller quantities.

Tartaric acid is dull and lower. We now quote 43½c for crystals and 44½c for powdered.

MANGANESE MERCHANT, MINERAL, CHEMICAL AND COLORS BROKER

SPECIALTIES.

Manganese of every quality and for all purposes, *Handled* in large or small quantities on *Purchase* sale or *Commission*. Good value guaranteed.

Bauxite (Hydrate of Alumina) Of high percentage of Alumina and almost free from Iron. The Best, Cheapest and most profitable article for producing Alum, Alum Cake, Sulphate of Alumina, &c. Mines are near Belfast and Larne whence cheap sailing and steam tonnage can be obtained to any point. (Brand "IRISH HILL BAUXITE.")

Fullers Earth of superior quality and entirely free from grit. (Brand "EMERALD B & S FULLERS EARTH.") The Best and Cheapest in the market.

Iron Ores—Antrim, Cumberland, Spanish, Manganiferious, &c.

Barytes---Carbonate.—My mines produce superfine quality and high percentage of Best Selected Lump, Nut and Grain. Close to Liverpool, whence freight is cheap. SULPHATE.—Prime White. Lump, Granulated and for ground to any fineness. (Brand "PURITY BARYTES.")

Terra Alba of pure white and finest grade produced.

French Chalk— "G G B Brand," China Clay, Culalamim, Antimony, Emery Stone Chrome Ore, Plumbago Strontia Wolfram.

Magnesite containing 98 per cent of Carbonate of Magnesia, Felspar, Fluor Spar, Phosphates, Rotten Stone.

Oxide of Iron, Venetian Reds, all shades, Umbers, Ochres, and all Colors.

Arsenic Soda Ash, Caustic Soda, Salt Cake and all Minerals, Chemicals and Colors.

Bauxite Mines and Mills, Fullers Earth Quarries, Belfast Co. Antrim. | BARYTES MINES, Nr. Rhyo MANGANESE AND MINERAL WORKS. GRINDING MILLS AND ORE YARDS, Garston

Offices: RICHMOND BUILDINGS. 26 Chapel St., LIVERPOOL.

Eglinton Alum Clay,

HYDRATE OF ALUMINA,

THE EGLINTON CHEMICAL COMPANY, Limited,

OF GLASGOW,

Who were the first to introduce this substance to the notice of ALUM MANUFACTURERS would call the attention of Manufacturing Chemists to it

As affording, when it can be got, of the special quality which this Company alone can supply) by far the most convenient and economical source of Alumina.

The Valuable Features of this ALUM CLAY are:

FIRST.—It contains, after expulsion of water, from *fifty to seventy-five per cent of Alumina*, which as it is originally in the form of **Hydrate of Alumina** is readily convertable into Aluminous products in a simple and inexpensive manner.

SECOND.—Its sole impurity consists practically of a *small percentage* of iron, amounting in the first quality to as little as *one-half per cent*, and which is readily eliminated by known processes.

THIRD.—Its moderate price.

The Eglinton Company will be glad to supply the Clay in such quantities as may be required at a price either in English or American currency and either f o b in the U. K. or delivered duly paid in the U. S. Shipping Steamship owners as well as Chemical manufacturers, they possess superior facilities for conducting this trade. They have also arranged special rates with one of the Transatlantic Shipping Companies and have frequent opportunities (the benefit of which they gladly grant to their customers) of shipping quantities by sailing vessels at a low ballast rate of freight.

Consumers may receive on application a trial parcel of 10 tons at a price of $5 per ton delivered duty free on quay at New York. The Caly is supplied in the natural state as raised but it may be had dried or ground if desired.

Powdered Double Refined Caustic Soda 98 Per Cent.—The purest and most highly concentrated alkali obtainable. A specialty for Soapmakers, Oil Refiners, Dyers Bleachers, Starch Manufacturers. Makes Soap in large or small quantities by simply mixing in the cold with tallow or oil. Absolutely no boiling required. Quality superior and cost much less than any boiled soap. No special apparatus whatever required. We strongly recommend all consumers to make their own fulling soap in this way. Full directions sent on application. This article can be substituted in most processes with great advantage and economy for Sal Soda or Soda Ash. Perfectly free from Iron. Dissolves instantly in cold water. Being a powder easily handled. Keeps perfectly without melting away. Packed in wood barrels.

Pure Caustic Potash.—In Iron drums, of any size. Free from Soda or Iron. A specialty for Soapmakers and Oil Refiners. Makes perfect Potash fulling soap without boiling, simply mixing with oil. Superseeds wood ashes entirely. Hard soap can both be cheapened and quality improved with this pure Potash. Full direction given. This Caustic Potash superior to Caustic Soda in many processes.

Refined Pearl Ashes or Pure Salts of Tartar.—This is almost absolutely pure Carbonate Potash. Contains only a trace of soda. A specialty for fine glass making. Wool scouring and Chemical purposes. Far superior to finest Montreal Pearl Ash Largest makers in the world of **Chlorate Potash** also **Bicarbonate Potash** &c.

We invite special attention to our
Three Fish Brand of
Norwegian Cod Liver Oil.

Having been the first here to import Cod Liver Oil largely, direct from Norway, we offer, as a result of our experience, this brand, believing it to be *Perfectly Pure, Free from Stearine*, and of a quality superior to any other Norwegian Cod Liver Oil imported in bulk.

All the *Genuine Oil* of this make, whether put up in original tin-lined barrels or cans, will bear the above brand and trade-mark.

We also offer a full and complete assortment of Mediterranean Sponges of choice qualities, recently selected by our representative in Europe.

DRUG MARKET.

For Drug Price List see pages following this report.

TUESDAY EVE., Nov. 30, 1880.

There has been a moderate business in general lines the past week and the aggregate may be considered exceedingly satisfactory for this period of the season. There has seldom been a year when the Fall trade held out as well as it does this year, and the month just closed will show an unusually heavy aggregate business in almost all branches of the trade. Prices do not show an advancing tendency in most cases, and among the fluctuations of the week there are more reductions than advances. The most important change has been in quinine, which is lower, after large transactions.

Among the out-of-town people in the city this week we have noticed one of the Messrs. Gilman Bros., of Boston, Mr. Hampden Osborne, of McCarthy & Osborne, the successors to J Durbin & Co., Denver, Colorado, and Mr. Thomas Lord, of Lord, Stoughtenburgh & Co., of Chicago. The last named firm is preparing to repair the losses occasioned by the recent fire in its establishment.

Opium.

But little interest has been shown in opium since our last report, and beyond a light jobbing demand no business is doing. The price is nominal and varies according to holders, some asking $6 95 for small lots of 10 lbs or less, and $6 85 for over this quantity and up to single cases, but this is above the general market, which may be quoted at $6 75@6 80, with sales in lots of 2 cs today at the lower figure, There is not the slightest enquiry for large parcels, and it would be difficult to give a reliable figure. The quoted price is about $5 75 in bond, but to place a lot less would have to be accepted and we hear that a lot of 12 cs has been offered to-day as low as $5 50 without finding a buyer. It was said that this was an attempt to bear the market and this would seem to be the case for we have it fron good authority that any lot of prime goods will readily find a buyer at this quotation. Notwithstanding the dullness of the market, there is a great deal of confidence being shown by holders and the feeling seems to be growing that a movement may be looked for shortly after the opening of the new year, or as soon as the weaker holders have been squeezed out. The foreign markets are still firm and from Smyrna we hear that new crop opium is to be had at a lower figure than prime old goods, which seems to confirm the news received some time that the new crop was turning out quite inferior in quality. The difference is said to be about 10c on the pound. From London we hear that the stock is very light and it is reported in this market that orders are expected to come here for supplies; should this prove to be a fact it would materially reduce our stock, and have an immediate effect on prices. It is also reported around that an effort is being quietly made to have the duty increased. There is a difference as to the amount, but it is generally put at $2 50 per pound, though we hardly expect to see such a project carried through this winter. Some of the more prominent drug merchants have been consulted on the subject by members of Congress, and, we believe, havo generally opposed such a mensure.

Morphine has been taken quite freely and orders are fair for the season. Manufacturers are still quoting $4 45@4 50 according to brand, and are filling trade requirements at these figures. Outside holders continue to be firm in their views as to the price, and we do not hear of anything offering below manufacturers figures, and the best that can be done is the allowance of a brokerage. Some parcels have been placed aside, the holders refusing to sell, as they express their confidence in higher figures later on.

Quinine.

There has been quite an excitement in quinine. Following our last the market was quiet until toward the close of the week. when a movement commenced in German. The sales and resales foot up about 20,000 ozs, all brands, at prices ranging from $2 35 to 2 47½. This was for spot lots, while for goods to arrive $2 40@2 45 were the general figures, and at these, contracts were made running into the spring months. On Saturday a good many bids were cabled abroad, some of which were accepted, but with the news of the movement here the foreign market became firmer, and on Monday, before the reduction on American was announced, as high as $2 47½ was bid and accepted for some lots on spot here. When the decline became generally known the excitement died out and the market weakened considerably until the close, when good brands could be had at $2 40, while some are said to be obtainable as low as $2 35. The foreign market is said to be 10s for German, and 11s for English. Domestic was quoted at $2 50@2 60 as to brand, until Monday morning, when a reduction was announced, the price being placed at $2 40@2 50 as to package, quantity and brand. At the reduced figures quite a movement set in, and some large orders were placed with the principal domestic manufacturers, one prominent Western house being entered for 4000 ozs. The sale of a domestic brand reported in our last at $2 40 was an error, no such sale having been made, as was clearly indicated by the figures themselves. Cinchonidia has been very active, and parcels are moving freely. Prices are firmly maintained, and are 70@75c as to brand, with a tendency to advance.

Balsams.

In these goods the business transacted since our last has been light. Peru is a shade higher, and others are without quotable change.

Copaiba has had a light jobbing inquiry and quotations are steady at 54@55c. The latter price has been paid for 5 kegs in lots, but it would be difficult to place a quantity at this figure; quotations from first hands are nominally the same as those given above, but we hear that some lots have been offered for less.

Tolu is rather unsettled, the quotations varying so much, according to holder, that it is difficult to determine the market. A fair quotation would be 62½@65c and this has been paid for some small parcels, but we hear that 60c has been accepted and would buy from one holder at the close.

Peru has not been active but prices advanced during the week and it is reported that as high as $2 50 had been paid for some jobbing lots. It was not so firm at the close and although $2 40@2 50 were nominally quoted, the last sales reported were of 2 drums at $2 25 and $2 30 respectively. It is thought that the latter figure would buy further parcels.

Fir has not moved freely. One barrel Canada is reported at $1 60, which is still the quotation.

Miscellaneous Drugs.

Business has been rather light in this market through the week and nearly all transactions have been of a jobbing nature. There have been a few changes, most of them in the direction of a decline, but none of them of much importance. Benzoic acid is lower. Iodide of potassum has been reduced 25c. Quicksilver and lycopodium are both easier, and juniper berries have met with a trifing reduction. Red arsenic is easier.

Alcohol has been quite active, and the market is much firmer in tone. For home use the price is $2 14@2 16, according to quantity, with dealers sold ahead. There was not much inquiry reported for export during the early part of the week, but toward the close more business has been done, and the price is 39@39½c, as to date of delivery.

Aloes are selling fairly in ordinary sized parcels, but round lots have not met with much inquiry. Quotations are: 40@42c for prime Socotrine, 25c for common, 20@25c for Barbadoes, according to quality, 11½@11½c for Cape, and 10@12c for Curacao. We get sales of 10 cases Cape in lots at the range; 5 cases Curacoa at 10½c, and 1000 lbs Socatrine at 40c.

Burgundy pitch is rather quiet, and only single stands have been taken. About 8 bbls are reported at 3¾@4c, though the inside figure is generally quoted for a quantity.

Borax is unchanged and continues to sell well in a jobbing way, but no large transactions are reported. Quotations are 11c in barrels and 11½c in cases for either city or California refined, and powdered is held at 11½@12c according to quantity.

Castile soap is not selling freely but in a jobbing way the business transacted during the week has been fair. The quotations for white are 12⅞@13c. Mottled ordinary 6½@6⅞c, and 9@9¼c for pure mottled, all ranging according to quantity. We note sales of 50 boxes white at 12⅞c, 50 at 12¾c, and 50 in lots at 13c, 5 boxes ordinary mottled at 6½c, and 75 boxes pure, part to arrive at the quoted range.

Colocynth apples are dull, and the transtions are all small. Trieste prime are quoted at 48@50c, as to quantity, and a few single cases have been taken at the latter. Spanish remain dull and nominal, at 30@35c, according to quantity.

Lupuline is dull, and only retail sales are making. Prime American is quoted at 45c, and 35@36c as to quantity are the figures for German. Sales of 200 lbs American in lots are reported.

Isinglass has not moved since our last, except in a jobbing way. We quote for Russian (best Beluga) $2 50@2 60 in quantity and $2 75@2 85 for jobbing lots. From $1 37½@1 50 will buy ordinary to good domestic and $1 70@1 75 is the quotation for a choice brand. We get sales 300 lbs of American at $1 50.

Red arsenic is easier, and single kegs can be had at 6c, while on a round lot this price would be shaded a trifle,

Myrbane oil is rather slow of sale, but prices are steadily maintained. Prime American brings 34c, and this has been paid for jobbing lots to the amount of 300 lbs. English is held at the same figure, and 40@42c are the quotations for German.

Cantharides remain quiet, and there is very little doing. From 90c@$1 10 will buy prime Russian, according to holder, and the latter price has been paid for two cases. Chinese are dull at 42½@45c.

Cocoa butter has a fair jobbing inquiry at 43@45c according to quantity, and we get sales of 25 boxes in lots at 44@45c.

Japan wax is unchanged, being quoted at 15@16c according to quantity, and meets with very little demand. Sales of 2 cases are reported at the outside price.

Juniper berries are not moving briskly. New berries are now in the market, and are obtainable at 2¾@3c, a shade below last week's figures. We hear of about 10 bags at 3c.

Sesame oil has not moved freely. On the spot $1 15@1 20 are the figures according to quantity. Most of the lots recently

ADVANCES MADE ON APPROVED GOOD

in were sold previous to arrival, and the offerings are not free.

Quicksilver is a shade easier, and although in a jobbing way 42c is still asked, 41½c will buy in quantity. The San Francisco *Commercial Herald* of the 18th inst says: "The outgoing steamship "Oceanic," for Hong Kong, will carry, it is said, 1000 flasks, purchased at 38½c. The receipts since November 1st were 5449 flasks.

Gelatine has only been in jobbing request, and prices remain steady. English has sold to the extent of 300 lbs at 65c; quotations are 60@65c as to quantity, and the same range is asked for French as to quality.

Benzoic acid (German) is lower, and $2 40@2 50 is the range of quotations, according to quality, though $2 60 is still asked for one brand. The demand is rather light, and we get no transactions.

Insect powder is dull, and there is very little inquiry noticed even for jobbing lots; quotations are 47½@50c for prime Dalmatian according to quality, though a special brand is held at higher figures. Persian can be had at 45c, and 40c will buy Trieste. We get sales of 3 kegs Dalmatian at 50c.

Guarana remains dull, and although the price for whole is not quotably lower, it is thought that 85c would be readily shaded on a quantity. Powdered is steady at $1 00.

Licorice has met with a fair sale in ordinary lots. Quotations are 28@29c for P. S., 28@30c for Guzolina, 32½@33½c for Corigliana, and 24@26c for domestic. We get sales of 10 cases Guzolina at 28½@29c, 3 cs large at 30c, and 8 cs P. S. in lots at 28@29c,

Ergot has not met with so much inquiry since our last, and we have very few transactions to report. Buyers have been ordering small lots of 100 to 200 lbs, and do not seem disposed to take larger parcels. The general range is 45@60c, as to quality, and the reported sales foot up some 2,000 lbs at 47½@55c.

Castor oil is in good jobbing request, and manufacturers continue to quote 11c in barrels and 11½c in cases for both City and Western oil. It is reported that a small lot of the former in cases was sold at 11c. Either Western or City can be had at 1c below the quotation, both in barrels and cases, from an outside holder.

Venice turpentine is quiet, and only single stands meet with any attention. We note sales of 6 at 16½c, and 1c below this is the price for a quantity.

Cuttle fish bones are in jobbing request, and 22c is the firm quotation at the close, though a sale of 5 straps was made early in the week at ½c less. We get sales of 10 straps at 22c, and 3 straps at the same price.

Iodide of potash has been reduced by the manufacturers, and is now obtainable at $2 45 in bulk and $2 50 in glass. The reduction took place on Saturday, and we hear of no special transactions at these prices.

Cassia buds have a fair jobbing inquiry which is met at 33c and this has been paid for 15 cs in lots. We get a sale of 2 cs new at 34c.

Irish moss is quiet and except in single barrels is meeting with no sale. We quote a range of 4½@8c from common to strictly prime. We get sales of 3 bbls good at 5¾c, 2 at 6½c and one bbl choice at 8c.

Cod liver oil is unchanged and only selling in a jobbing way. Quotations for Norwegian range from $28@36 according to brand; Newfoundland is quotable at 75@80c as to quantity, and 5 bbls have been taken at 77½c.

Citric acid is quiet but steady at 58c, and 5 single kgs have been taken at this.

Tonca beans are rather quiet and we hear of no important transactions. Angostura can be had at $2 20@2 25 and Para at $1 50, while $1 95@2 are the nominal asking figures for Surinam. Sales of 200 lbs prime Angostura are reported at $2 25.

Lycopodium is lower and 36@37c will now readily buy a prime quality. The demand is very light and no sales are reported.

Glycerine is in good demand and at the ruling quotations holders are said to be behind their orders. From 25@29c is the range for American as to quantity and package and German is steady at 24@26c, prices for both being firm.

Precipitated chalk is steady at 7½c in bulk and 9c in bundles, but is not moving freely, the demand being only moderate and for jobbing lots.

Vanilla beans are quiet and we hear of no transactions. The range of quotations is $4@12 according to quality, with $14 quoted for choice beans, extra size.

Barks.

These goods are dull and we have no change in quotations to note.

Butternut of a prime quality is quotable at 5c and this has been paid for 300 lbs.

Cascarilla meets with a very light demand. Prime sifted bark has sold to the extent of 4 bales at 7½@7¾c, though these figures could be shaded slightly. Ordinary is obtainable at 5½c.

Cherry bark is quiet and quotations are unchanged. Ordinary is held at 5½@6c; whole new bark of a prime quality can be had at 8c and 9c is the fig re for racked; 5 bags of ordinary quality whole are reported at 5½@6c.

Cottonroot to the amount of 500 lbs has sold at 8@9c and this is still the quotable range.

Elm bark, selected, is quotable at 11½@12c as to quantity. Sales of 50 bundles at the latter.

Orange peel is quotable at 5@6½c as to quality and 5 bales are reported taken at the latter. Prime Malaga and Curacao ribbon in a jobbing way are quoted at 7c and 12c respectively.

Prickly ash bark at 7@10c, according to quality, meets with very little inquiry.

Sassafras bark is not moving; quotations are 6c for ordinary, and 6½c for prime, in jobbing lots.

Soap bark is obtainable at a range of 6½@8c from common to prime. We note no transactions.

Essential Oils.

There has been no excitement in these goods during the week. The trade has been moderate and only jobbing quantities are moving There have been but few changes and these are not of any great importance. Anise and cassia are lower, sassafras is a shade easier and wintergreen has advanced 10@15c.

Anise has not met with a great deal of attention and although some dealers still hold their stocks at $1 95@2, others will accept $1 90 for ordinary lots, and a few cases are reported at this. A sale of 3 cases is reported at $1 95. A bid was solicited on a lot of 50cs, but no price was named.

Almond (bitter) has a light jobbing sale at last week's figures but round lots are not wanted. Prime oil is quotable at $7 25@7 50 as to quantity, and a lower grade can be had at $5 25.

Bay in a small way has met with the usual steady jobbing trade, but there has been no movement of any importance Pure oil of a prime quality is steady at $12 per 22 oz bottle, and $10 50 is the figure at which the lower grade is offering.

Bergamot is still firmly held at $2 35@2 50 according to brand. The demand at the moment is very light and we only hear of jobbing sales, 5 single cases being taken at the outside figure.

Cajeput meets with very little attention. No important movement is noted and even the jobbing sales are small. A few single cans have been taken at 70c, and this is the quotation at the close, with round lots obtainable at 2c less.

Caraway continues quiet, and nothing of any consequence has transpired during the week. The extreme range of quotations is still $1 70@2 25 according to quality. Jobbing sales to the extent of 8 cans are reported; 3 at the inside figure and the balance at $2.

Cassia, although meeting with a fair inquiry in small lots, is not moving briskly, and prices have weakened in consequence. A strictly prime grade is held at 90@95c, and the outside figure has been accepted for 5 cases in lots. Ordinary is nominal at 85c.

Cedar (pure) is dull and the only transactions that have come within our notice have been of a retail description. Quotations are 35@40c according to quantity. Lebanon cedarwood is held at $1.

Citronelle is in light request for small lots and prices remain steady and unchanged. Native is quotable at $1 20, Winter's at $1 35 and Fisher's at $1 25. Neither brands are freely offered as stocks appear to be well controlled. We get sales of 2 cases native at $1 20.

Clove is only in jobbing request and we have no important business to report. Small sales of 10 and 25 lb lots are reported at $2 40@2 45, though the outside price is the general quotation.

Cubeb has not moved freely, but $2 50 is still the firm quotation for pure oil and we have not heard of any shading. A single can is reported at this.

Fennel is without change; nominally quoted at a range of 85c@$2 25 for common to strictly prime.

Juniper is slow of sale, even jobbing lots meeting with very little attention. Quotations are 75c for common, 95c@$1 10 for ordinary to good and up to $2 20 for a strictly prime grade. Oil of juniper wood is offering at 32c. We get sales of 2 cans good at $1 10, 200 lbs prime at $2 15@2 20, and 100 lbs common at 90c.

Lavender has not quotably changed. The demand is only moderate and for small lots. Ordinary garden is obtainable at 60c, prime at 90c, and $1 70 is the firm asking figure for Chiri's fleure. We get sales of 5 cs garden at the range, and 1 cs of Chiri's at $1 70.

Lemon is not active and the only business effected during the past week has been of a jobbing character. The range of quotations is from $2 55@2 87½ according to brand, though the outside price has been shaded 5c on 10 cans of one of the best known brands. Further small sales are reported of single cans at $2 87½.

Lemongrass is quiet and sales have been light. Quotations are 80@85c according to quantity and a few cases were reported at the inside figure.

Neroli has met with very little attention, but prices are unchanged, quotations being $48@50.

Orange is in light jobbing request, but large parcels are not moving; quotations are still $2 65@3 as to brand, though $3@3 25 as to holder is asked for one of the best known. Small sales of 4 single cans are reported at $3 12½@3 15.

Orange (bitter) is only selling in retail quantities, but prices are firm and are not shaded. We continue to quote $3 75@4 as to quantity for pure oil.

Origanum remains dull and is without interesting feature to report. Light sales are making at 28c, and this is still the jobbing quotation, though 26c will buy a quantity.

Pennyroyal has a jobbing sale in small lots at $1 25, and this figure is the quotation at the close. We hear that a small sale has been made at $1 15, but the report was not confirmed, and no holders are quoting less than $1 25.

Peppermint is not active and quotations among the different holders vary considerably. The range on tin oil is $2 85@3 for either Western or Wayne county prime. Cases are held at $3@3 35 as to brand by holders here, but in regard to that offered at the latter price the manufacturers advise us that they "decline to go on with sales at less than $3 75 per lb, as the crop has turned out very small this season, probably not one quarter of the ordinary crop being produced." They have hopes of seeing the product go to $4@5 in New York.

Rose is meeting with a fair jobbing inquiry at last week's figures. We quote $5 75@6 as to quantity for both Holstein's and Ihmsen's.

Rosemary is rather quiet at the moment and only light jobbing sales are making Quotations are 40c for Trieste, 32@33c for French as to quantity, and 80c for Chiri's best. We get sales of 7 cases French at full figures.

Sassafras is a shade easier; now obtainable at 50c. The demand is moderate and no special transactions are reported.

Savin is dull and quotations are almost entirely nominal at 75c for ordinary and 90c for prime in a jobbing way.

Spearmint has sold in very small jobbing quantities. A few single cans have been taken at $2, and cases are steadily held at $2 20.

Sandalwood is rather dull and we have no business to report. Prime English is quoted at $7 25@7 50 and German at $3 75.

Tanzy has sold to the extent of 2 cans at $2 75 and $2 70@2 75 is the range of quotations as to quantity. The demand is very light.

Thyme is moving very slowly in small lots and in a large way nothing has been done. Quotations are 60c@$1 for red and 90c@$1 15 for white, both according to quality. We get sales of 3 cans prime white at the outside price and 2 cans red at $1.

Wintergreen has been quiet through the week. About 300 lbs are reported at $3 and 2 cans at $3 10, while at the close $3 10@3 15 is quoted according to quantity.

Wormseed is nominal at $1 37@1 40 according to quantity.

Wormwood is without inquiry. The last sale reported was at $5 50.

Flowers.

In this market goods have only been moving in small lots, and business on the whole has been dull. Arnicas are easier and American saffron is a shade firmer.

Arnicas have met with a light inquiry and are a shade off in price. The marke may be quoted at about 11c, though 10½c has been accepted for several bales of prime flowers, and would still buy further lots. It is reported that some lots were offering during the week as low as 10c. In spite of the low prices ruling at present there seems to be a confident feeling generally among holders that the market will soon recover, and better prices are looked for. At the close one holder refuses to shade 12c for prime goods.

Chamomiles are rather slow of sale at the moment though prices show no weakening tendency. Quotations are 17@20c for Roman and Belgian, and German are generally held at 30c, though as low as 27c is said to have been accepted for a lot of 1000 lbs. We get further sales of 5 single bales Roman at the range part not strictly prime bright flowers.

Saffron (American) is rather firmer in price, 30c being the general quotation, the low priced goods noted in our last having been taken off the market. Sales of 4 barrels are reported at 30c. Spanish is steady at $10 50 for Alicante and $13 for Valencia.

Elder flowers are dull and unchanged in price. Quotations are 12@15c according to quality. A single bale of a good quality sold at 13½c.

Lavender flowers have met with some inquiry since our last but the trade has been light. A sale of 5 bales prime is reported at 3⅞c. Quotations are nominally 3¾@4½c as to quality.

Calendula flowers are dull and nominal at 37½@50c for German as to quality and 28c for American.

Gums.

Very little of importance has occurred since we last wrote. Nearly all prices are steady, the changes that have taken place being slight and of trifling importance, with the exception of assafoetida, which is considerably lower.

Arabics have had very little inquiry during the week and we hear of nothing but jobbing sales. Quotations are 36@37c for firsts, 26c for seconds, 23c for thirds, 14@18c for fourths and 15@17c for sorts. The sales are 3 cases firsts at 37c, 5 cases sorts at 16½@17c and 500 lbs siftings at a private price.

Assafoetida is still quoted by some large holders at 17@20c according to quality, but some prime gum can now be had at 15@16½c, and 10 cases have been taken in lots at 15@16c, while 3 cases of common gum are reported at 14c. The demand is not large at the moment and there is said to be a good stock in the market.

Camphor is quiet again but manufacturers continue to quote 26c for barrels and 26½c for cases, but we get sales of 25 barrels from outside holders at 25¾@26c. The latest advices from China report an advance of 8@10s sterling per cwt on the crude gum.

Gamboge continues inactive, but prices remain firm. Quotations are 67½@70c for prime pipe according to holder. Ordinary

gum in mats is quoted at 65c, but this would probably be shaded.

Benzoin has only a light jobbing demand which is met at previous quotations on all grades. Ordinary gum is obtainable at 25c, while 35@42c is the range for good to prime. We note sales of 3 cases at the latter figure.

Gedda is held at 8½@10c according to quality, and a single cask is reported taken at the latter figure. The demand is very slack and price are rather easy.

Kino is dull but without quotable change. The general asking figure is 45c for prime gum, but less will buy a quantity.

Guaiac is selling in small lots to meet present wants, but the market, although steady, is not active. Quotations are 27@35c from common to prime gum.

Mastic is not moving. The only inquiry noticed has been for small jobbing lots and quotations, although steady, are rather nominal at $1 50@1 75 according to quality.

Myrrh in a jobbing way has not been inquired for, and beyond a few jobbing transactions nothing has been done since our last. The range is 27@38c according to quality for East India and 48@50c for prime Turkish.

Olibanum is dull. A few jobbing sales of single cases have been made within the range but large lots are not wanted. Prime is held at 22@22½c and common gum can be had as low as 8½c.

Shellac, on the day following our last, was quoted down 1c per lb by the largest holders, but this could hardly be called a decline, as sales had been made the previous week at prices fully as low. While there was no speculative interest manifested during the earlier part of the week, there was a good consumptive demand. There have been jobbing sales made of 40 cases D. C. at 41c down to 39c, 5 cases B. S. L. early in the week at 39c, and 5 cases F. A. B. at about the same time at 37c. The quotations as revised are 39c for D. C., 37c for V. S. O., 35c for octagon B., Diamond I. and O. K., 34c for Diamond S. and D. G., 32@34c for good seconds and 29c for garnet. These prices would be shaded fully 1c per lb in 50 case lots. During the last two days there has been a good deal of excitement among the largest operators here over a report, which there seemed every reason to believe, that the entire stock of one importer, some 3,500 cases, afloat and in store, had been sold at about 36@37c. The general impression seemed to be that the report was merely a ruse to force a prominent firm that had been showing an inclination to bear the market to take the other "tack." If this were so it has not proved successful, for at the close the lower quotations made early in the week were still being accepted, nowithstanding cable reports of higher markets in London and Calcutta. The latest advices concerning the new crop of stic lac is that it is fair, but not up to the average of the past few years.

Tragacanths are quiet and firm but prices have not changed. We continue to quote $1@1 10 for choice ribbon gum, 80@90c for firsts, 60@75c for seconds, and 45@55c for thirds, all ranging as to quantity. We note sales of 8 cs at 50@55c.

Roots, Herbs and Leaves.

Again we are obliged to chronicle the intervention of a holiday in the midst of the business week, which has caused a temporary lull in the trade. In consequence of this break we have very little of importance to report. There is a steady, fair consumpive outlet for the more important of these goods and the aggregate has not been mall, though individual transactions have been mostly of a jobbing nature There are but few changes to note, and those appear to by of trifling importance.

Aconite root has not met with much attention since our last, only small jobbing lots being taken, but on account of the light stocks of prime in this market holders remain firm in their views and are not forcing sales. A common grade can be had at 12c, while 15c is asked for strictly prime, and the sales amount to 5 bales of the former and 690 lbs of the latter, both in lots, at full figures. The leaves are quiet and still held at 12c.

Althea root meets with a light sale in small lots at last week's figures, which are 14@16c for both whole and cut according to quality. We note sales of 3 bales whole at 14@15c and 200 lbs prime cut at 16c and 400 lbs, in lots, ordinary at 14@15c.

Alkanet root is dull and we have no special transactions to report. The range is 8@10c according to quality, and we only hear of a few bales of prime at the outside figure.

Arrowroot in a jobbing way continues to meet with a fair inquiry and prices remain steady and unchanged, but round lots are not in demand at the moment. Prime Bermuda is quotable at 38@42c according to quantity. A sale of 300 lbs is reported at 40c and 40@42c is reported paid for 500 lbs more in jobbing lots. For St Vincent 7½@9½c as to quantity and package is the range of quotations.

Belladonna root has sold in small lots to the extent of 5 bales at 14@15c which is still the quotable range for prime according to quantity. The demand is altogether of a jobbing character. We hear of no movement in the leaves which, on account of the reported scarcity are still firmly held at 18@20c according to quality.

Buchu (short) is not yet in full supply, but the small arrivals noted a short time ago have eased the price somewhat and quotations are now 17@19c for yellow leaves as to quality and some small lots of a fair grade of green (not bright) can be had at 22c. Only jobbing sales are making, and we hear of 4 bales at 20½c, and 1 bale at 22c. We note sales of 5 bales of long at 38@40c and further lots can be had at the range according to quantity.

Black cohosh is dull. We only hear of 3 bales at 4c and continue to quote 2¾@4¼c as to quality.

Calamus has met with no change in quotations and the business doing is very light. We quote for ordinary unbleached split and peeled 8c, and 14@16c for prime as to quantity, while prime bleached is steady at 27@30c according to size of order. Unbleached is jobbing slowly at the range, and we note sales of 4 bales prime bleached at 27@30c.

Canabis Indica has sold to the extent of 150 lbs at 26@27c.

Canada snake root is quiet. We get sales of 5 single bales at 15c, but less would probably be accepted for a quantity, and we hear of sales of 2 bales at 13¾c.

Culvers root is rather slow of sale but steady in price, 9@11c as to quality and quantity being the quotable range. We note sales of 500 lbs ordinary at the inside figure, and 1000 lbs said to be prime, in lots at 10½@11c.

Coca leaves continue in steady jobbing request and prices continue firm. Quotations are 40@45c for a good grade, and at the former 300 lbs have been taken, while the outside price has been paid for 2 bales. Choice leaves are held at 60c, but we hear of no sales except of a single bale. The stock of the latter grade is becoming reduced. Poor dark leaves can be had at 28c but are not wanted.

Columbo root is without inquiry and the quotation of 17c is entirely nominal.

Dandelion is in fair request and in a jobbing way German has sold to the extent of 1000 lbs in lots at 12@14c. At this range further small lots are obtainable on the spot. We hear that sales have been made to arrive as high as 16c, but the particulars were not given. The range for American cracked is still 9@10c according to quantity, but there is not much demand at the moment. Three barrels sold at the outside figure.

Damiana (California) of a prime quality has sold to the extent of three bales at 55c. There is only a moderate demand, but holders are firm at the above quotation, which cannot be shaded on a quantity. Mexican is without inquiry and entirely nominal at 35c.

Digitalis continues to meet with a very light demand, and although 35c is still the nominal quotation, we hear of sales to the amount of 400 lbs at 28c, said to be prime. Further small lots might be picked up at this, but 35c is still the lowest direct quotation we get.

Galangal root has met with no sale during the week with the exception of a few single bgs, which are reported at 7c. A quantity could readily be purchased at 6¼c, while even this could possibly be shaded.

Gentian, whole, cannot be had below 5c, and this has been paid for some small lots amounting to about 1000 lbs, while 6c is the figure asked by some holders. It is reported that the entire stock in this market is controlled by two or three strong parties. Powdered is quoted at 8c in barrels and 8½@9c in boxes, though the inside price has been refused for a few barrels and ½c more demanded.

Golden seal has not changed in price, nor has the demand improved since our last. The general asking figures are 7@8c according to quantity, but there is still a small lot of prime new root held at 8½c by one dealer. We note sales of 4 single bags at 8c.

Grindelia robusta is not wanted, and remains nominal at 25@28c as to quantity.

Henbane is in very light demand, but as stocks continue light and there seems to be no prospect of an immediate increase, holders still demand 35c for prime leaves. This figure has been paid for a few very small parcels. At the close we hear that 30c has been accepted by some.

Ipecac has not changed in price, $1 35 being the quotation for whole and $1 40 for powdered. A few seroons have been taken at $1 35, but we hear of no important movement. There seems to be a little firmer tone to the market. It is said that some small lots that could be purchased below the quotation last week are now held at $1 35.

Jamaica ginger is rather inactive. There is a light trade doing in single barrels, but round lots are meeting with no inquiry at the moment, though the market shows no weakness, prices on all grades being well maintained. For unbleached 14@16c is the range, while 17@19c is asked for bleached.

Jaborandi continues to meet with a light jobbing demand, but round lots are not wanted. Prices have not changed and range from 22@25c as to quality, and about 600 lbs of a prime grade have been taken at the latter.

Jalap is obtainable at a range of 19@21c according to quantity. The demand continues light and we only hear of 10 bales in lots at 20@21c. Powdered can be had at 32c.

Lady slipper at 8@10c as to quality and quantity is very slow of sale. We have no transactions of any importance to report. A few bags of prime sold at 10c.

Marjoram has not met with much sale during the week. In a jobbing way some small parcels of French have been taken at 14c, and 20c remains the nominal asking figure for German, though it is probable less will buy.

Laurel leaves are not wanted except in very small quantities. The range is 3¾@4c as to quantity, and we only hear of a few single bales at the latter.

Licorice root has not moved since our last. The cargo of 250,000 lbs reported sold last week was not a recent arrival, but has been in port about two months. It is said that everything here and to arrive has been bought, and that only moderate sized lots are now obtainable. Quotations are 9@15c for select.

Lobelia leaves are obtainable at 9c. The demand is only for retail quantities.

Lovage root is dull at 9½@15c according to quality. Only jobbing transactions are reported to the extent of three bales prime at the latter.

Mandrake is in jobbing demand, but large parcels are not moving. Sales of 10 bags in lots at 3¾@4c are reported, and the inside figure would be shaded about ¼c on a round lot:

Matico leaves are dull. A few single bales are reported at 22c, and this will buy further lots, though some holders continue to quote 25c.

Nux vomica has not moved freely since our last, the only business reported being a few jobbing sales, about 1200 lbs in all, at 3¾@4c. In quantity 3½c will buy.

Orris root has met with a fair inquiry in ordinary lots, but the only large parcel reported taken was of a lot of 2000 lbs Florentine at a private price. The range of quotations for this grade is 15@18c from ordinary to strictly prime "bold" root. Jobbing sales have been made to the extent of 400 lbs ordinary and good at 15@16c, and 300 lbs prime at 17½c. Verona can be had at 7@7½c according to quantity, though very small jobbing lots bring as high as 10c.

Pink root (true) has sold to the extent of 6 bags at 27c, and 25@30c is still the quoted range according to quantity. The demand at present is rather light.

Rhatany is dull and unchanged. Ordinary is quotable at 12c, and 15c is the quotation for prime. A few bales of prime have been taken at this.

Rhubarb has not sold freely during the past week. The general range for whole is 30@70c as to quality, though some choice lots of "bold" root are held as high as 90c. We get sales of 2 cases at 50c, and 500 lbs in lots at 70c, and 90c is reported paid for a few jobbing lots. Cut is quotable at 90c@$1 15 as to quality, and at the range small sales are making. We get a sale of 500 lbs powdered at a private figure.

Sage has not met with much inquiry during the week. The quotation for spot lots is still 3¼@3½c as to quantity, but we hear that lots of 100 bales to arrive have been offered at 1¾c. The cargoes overdue are not yet in port.

Sarsaparilla (Honduras) has not been taken freely, and quotations are unaltered. For home grade 32@33c are the figures, and 35c will buy export quality. Some small sales of ordinary home grades are reported at this range. Mexican has sold to the extent of 20 bales at 8@9c, and this is still the range as to quantity.

Senna has a fair jobbing inquiry, but round lots are rather slow of sale. We quote for Tinnivelly 10@16c from common to strictly prime, while some choice lots are held at a trifle above the latter figure; We note sales of 3 bales at 10c, 5 bales good at 13½@14c, and 2 bales prime at 16c. Alexandria natural is still quotable at a range of 8½@13c as to quality and holder, some offering prime goods as low as 10½c. The latter price has been paid for 4 bales; 3 have been taken at 11c, and several of the common grades at 9@9½c. For garbled and sifted 27@40c as to quality and style of package is quoted. From 6½@7c is the quotation for East India, but we hear of no movement.

Senega remains inactive with prices nominally unchanged. The quotations are 50@55c for Western and 60c for Southern, though one holder asks as high as 75c. A few bags of Western have been taken at 55c.

Serpentaria is dull and we have heard of no special transactions since our last. Quotations are 25@35c according to holder but 30c is the highest price reported paid. We get jobbing sales of 3 bales at 28@30c. true Virginia. Texas root is obtainable at 18c.

Squills at a range of 6½@8½c from common to strictly prime has met with a fair jobbing demand. We are reported sales of 2 bales prime white at 8½c and 4 single bales at 6½@7½c.

Stillingia is not wanted. The nominal quotations are 6½@7c as to quantity.

Summer savory has not met with much inquiry during the week. The nominal quotation is still 8c, and although some dealers are still firm at this, small sales have been made at a shade below and 3 bales are reported taken at 7c.

Thyme is easier though some holders still quote last week's figures. We get sales of 10 bales French at 10c, and 12@13½c has been accepted for German. The weakness is said to have been caused by lots to arrive, that are near at hand.

Uva ursi is not active. Some small sales have been made at 4⅞c, but although this figure or even a shade less would probably be accepted for a quantity, the jobbing price is now 5c, and this has been paid for a few single bales.

Valerian continues to sell in a jobbing way at unchanged figures. German is held at 11@15c as to quality, and sales of 2 bales are reported at 12c, and 3 at 15c. From 16@17c will buy English, as to quantity, and 2 single bales have been taken at the latter. For Vermont 9@11c is the range according to quality. We note no sales.

Seeds.

Nearly all the goods in this market have been dull during the week, and up to the close very few changes have taken place in quotations.

Anise, in a jobbing way, has met with some attention, but the business transacted has not been large. Italian is quotable at 10½@12½c as to holder, but the latter is an extreme price, and we have not heard of more than 11½c being paid, which was accepted for 10 bags, said to be prime. German at 9@9½c has sold to the extent of 8 bales. Star anise is quiet but steady at 27½c.

Canary seed has been very dull and we have not heard of a single transaction worth reporting. Quotations are $1 45 for Smyrna, $1 55 for prime Sicily, and $1 60 for Spanish, though small parcels of either grade bring a trifle more.

Caraway is rather quiet. Dutch is held at 6¾@7c as to quantity, and 10 bgs have been taken at the inside price. German and English are both quoted at 7c.

Cardamons have become quiet. The demand is not so large, and the sales now making are small. Quotations are $2 20@2 50 for Malabars, $2@2 25 for Alleppeys, and $2 75 for Mangalores.

Fennel can be had at 11½@12c, according to quantity, and the latter has been paid for some jobbing lots of German, in all 10 bags.

Cummin is dull and unchanged. A few bags have been taken at 13c, and 12½@13c according to quantity is still the quotable range.

Coriander is dull, and only small lots are being taken. Quotations are 4¾@5c for German, 5c for French, and 7@8c for English. Sales of 6 bags of the latter are reported at 7½@7¾c.

Celery is jobbing at 16c, and 3 bales have been taken at this.

Millet is dull and nominal at 3c for domestic and 4c for foreign.

Hemp has been quite active. The stock has been bought up and is now held by two parties, the bulk of it being controlled by one party who is holding for higher prices. The small lots of the other party are said to be the only ones depressing the market, prices here being lower than abroad. The last quotation named at the close was $1 17½@1 20, but an advance is looked for.

Rapeseed has not moved since our last; quotations are $2 75 for English, $2 25 for German and $1 90@1 95 for domestic.

Mustard seed has only been taken in small lots, but prices remain steady on all grades. We report former quotations of 5@5½c for Trieste brown, as to quantity, 4c for California yellow, 4½c for California brown, 4c for Russian yellow, and 7@7½c for English yellow, according to quantity. We quote sales of 25 barrels Trieste brown in lots at 5¼@5½.

Foenugreck (German) has sold to the extent of 2000 lbs at about 4⅛, and 4¼c is quoted for further lots.

Spices.

Cassia continues to meet with a good enquiry, and parcels are moving as wanted. There have been sales of 150 cs and 200 bales at full figures. There is a steady tone to the market and holders are quoting 18@18¼c for China, while Batavia is held at 17c. There have been some small sales of Saigon at 31½c for prime white ordinary quality of chips is to be had at 19c.

Cloves have not changed, and the market is still irregular; 34c is the quotation for small parcels, but anything of a quantity cannot be had at this, and even small lots are difficult to obtain. There have been few sales, in all 20 bags, reported. In a small way, 37c is quoted for the lots moving. Stems are in good demand, and are firm at 13½@14c, as to quantity.

Ginger has been quite active, and the market is firmer. The position of this article is a strong one, and there is little doubt among the trade that higher figures will have to be paid. At the moment there is nothing afloat from the producing points, and no lots can be had from London. The sales are 700 bales African at 5⅛@5¼c, and 200 bales Calcutta. This leaves the stock in a good shape and concentrated in few hands. Calcutta is now generally quoted at 5¼c, while African is held at 5½c; but but there are some lots of London packed, which are to be had a shade under these figures. Cochin has not been much inquired for, and is still held at 8@12c, as to quality.

Mace has been dull, and only a few jobbing sales have been made. There is an easier feeling among sellers, who are now willing to sell Batavia at 65c, but Penang is still held at 72½c.

Nutmegs are in good trade demand, though we do not hear of any large parcels changing hands. There have been some lots, in all 100 cs disposed of at full figures and the market is steady. Prime grades are quoted at 85@87½c for 100s and 110s, but 72½c will be accepted for 170s.

Pepper has continued quite active since our last, and there have been some large transactions, though toward the close the feeling is quiet. The sales are between 4,000@5,000 bales Singapore and 1,000 bales Sumatra. There are some sellers who are still willing to accept 14¾c for Singapore, but others will not accept less than 15c. Sumatra is rather easier, and 14c will now be accepted for lots, though the general figure is 14¼c. White is selling steadily in small lots, and no change is noted, 20c for Penang and 21c for Singapore being still the quotations. Red peppers are doing better. There have been sales of some 200 bales, the market closing firm at 24c.

Pimento has not been much inquired for during the week, and the market is not so firm. The sales have been only small, and though 17½c is still the general figure, 17c will be readily accepted for some parcels of prime.

Druggists' Sundries.

Fancy goods, such as are usually sold during holidays, have been in good demand the past week, and other goods have not been dull for the season. As a rule prices are firm, and jobbers are running their stocks pretty low, and will carry comparatively few goods over the year. Celluloid goods have had an unprecedented sale the past season. Among the latest novelties we notice perfumed artificial flowers in pots; they have sold well. Also whisk brooms with bone handles and rings which have sold at $5 per dozen. Olive wood made into a great variety of articles are very pretty and have met with a large sale for high priced goods. The newest article, however, that we see about is a combined hand and toilet adjustable, rotary motion mirror, mounted on nickel plated metal. They sell at about $42 per doz.

In sponges there is no material change since last week. Latest advices still confirm the previous report of unsuccessful fishing off the coast of Florida in consequence of the storms which have kept the water too muddy to allow the divers to work. The fleet is still out and may have better success later. The supply of sheep's wool here is light, and this has a tendency to check sales. The best unbleached, large sizes, are held at $2@2 25, with small and inferior selling as low as $1 50@1 75. Best bleached are quoted at $1 50@1 75. Foreign kinds are quiet with no changes in prices and no arrivals.

Chamois skins are in fair demand and steady. Some importers report a small supply of the very smallest, which sell at about $3 per kip, and also of the large sizes, which sell at $25@30.

Corks are in fair demand and discounts continue somewhat irregular. The more general discount is 33@40 per cent according to the buyer and size of order, but it is said that some of the less prominent manufacturers are exceeding their figures.

PHARMACEUTICAL ITEMS.

Elixirs.

At the last meeting of the American Pharmaceutical Association a paper on elixirs, accompanied by samples, was read by R. W. Gardner, of Messrs. Schieffelin & Co.'s laboratory, in which, after pointing out the absolute necessity of establishing standard formulæ for the principal elixirs, he proposed that the Association appoint a standing committee on elixirs; that the members be requested to send to this committee samples of all elixirs; each bottle to bear a label giving the working formula, date of preparation, and name of contributor; that the committee prepare elixirs from such published formulæ as may be thought proper; that these various specimens be kept and their condition reported upon or exhibited each year, for, say three years, at the end of which period such preparations as have stood the test of time, and are the most palatable, etc., be given the sanction of the Association, credit being given to the originator. As to the general remarks and suggestions contained in the paper, substantially the same have appeared in our columns from time to time, with a few exceptions. The following formulæ were submitted:

1. Curacoa Flavor—

Tinct. curacoa co.....fl oz 8
" fresh orange peel..... " 16
Orange flower water..... " 12
Syrup..... " 70
Alcohol..... " 72
Water..... " 36

2. Tincture Fresh Orange Peel—

Outer rind of fresh orange.....oz 8
Alcohol .....q s to percolate fl oz 16

3. Tincture of Curacoa, Compound—

Curacoa peel, ground.....oz 24
Cloves " .....oz 1
Canella " .....oz 1
Alcohol.....q s to percolate fl oz 64

4 Fresh Lemon Peel—

Outer rind of fresh lemon.....oz 16
Alcohol.....q s to percolate fl oz 32

5. Citro-Ammoniacal Solution of Ferric Phosphate—

Phosphate of sodium.....oz 7½
Solution of tersulphate of iron....fl oz 7
Citric acid.....oz 2
Water of ammonia, U. S. P..fl oz 5½ or q s

Dissolve the phosphate of sodium in q s water, and precipitate it with the solution of tersulphide of iron. Dissolve the citric acid in the ammonia, add the solution to the washed phosphate of iron, and evaporate at under 140 deg F. to troy oz 16. This solution contains 50 per cent of the salt.

6. Solution of Citrate of Ammonium—

Citric acid.....fl oz 16
Water of ammonia, q s to neutralize.

7. Solution of Saccharated Pepsin—

Saccharated pepsin..... oz 3 grs 310
Water.....fl oz 16
Hydrochloric acid.....fl dr 3½
Glycerine.....fl oz 4

8. Elixir of Ammonio-Citrate of Bismuth—

Ammonio-citrate of bismuth oz 2 grs 64
Oil of orange.....fl dr 1½
Orange-flower water .....fl oz 4
Phosphate of calcium .....q s
Extract of vanilla.....fl oz ½
Alcohol.....fl oz 24
Syrup.....fl oz 24
Water.....q s to make 1 gal

The phosphate of calcium in this, and other succeeding formulæ, is to be used as a triturant, to incorporate the oils with the water and alcohol, and to obtain a clear filtrate.

9. Elixir of Blackberry Root—

Fluid extract of blackberry.fl oz 10 min 320
Tinct of orange peel .....fl oz 2
Oil of orange .....min 15
" cassia.....min 8
" anise.....min 8
" coriander.....min 8
" nutmeg.....min 4
" rose.....min 4
Extract of vanilla..... fl oz 2
Phosphate of calcium.....q s
Syrup.....fl oz 52
Alcohol.....fl oz 28
Water.....q s to make 1 gal

10. Citro-Ammoniacal Solution of Chloride of Iron—

Solution of chloride of iron.fl oz 48
Citric acid.....oz 54 grs 197
Carbonate of sodium, cryst..oz 100 grs 5
Water.....q s

Dissolve the carbonate and acid in 6 pints of water; mix this solution gradually with the iron solution, and add water to make 12 pints.

11. Elixir of Bromide of Calcium—

Bromide of calcium.....oz 10 grs 320
Elixir of orange comp.....q s to gal 1

12. Elixir of Bromide of Potassium—

13. Elixir of Bromide of Sodium are prepared like No. 11.

14. Elixir of Calisaya Bark—

Tinct. of orange peel.....fl oz 2
Oil of orange .....min 15
" cassia.....min 8
" Anise.....min 8
" coriander.....min 8
" nutmeg.....min 4
" rose.....min 4
Extract of vanilla.....fl oz 2
Syrup.....fl oz 50
Alcohol.....fl oz 31
Citric acid.....grs 20
Sulphate of quinia.....grs 130
" cinchona .....grs 65
Phosphate of calcium .....q s
Caramel (sugar coloring.....min 10
Water .....q s to make gal 1

15. Elixir of Calisaya and Iron—

Tinture of lemon peel.....fl oz 1 min 300
Oil of orange.....min 65
" lemon.....min 30
" cloves.....min 30
" cassia.....min 6
" nutmegs .....min 6
Alcohol .....fl oz 21
Pyrophosphate of iron....fl oz 2 grs 64
Sulphate of quinia.....grs 130
" cinchonia.....grs 65
Phosphate of calcium.....q s
Syrup.....fl oz 48
Citric acid.....grs 25
Water of ammonia.....q s
Glycerin.....fl oz 1 min 360
Water.....q s to make gal 1

16. Elixir of Calisaya, Iron and Bismuth.

Ammonio-citrate of bismuth....oz 2 grs 64
Water, q s to dissolve.
Elixir of calisaya and iron q s to make gal 1

17. Elixir of Calisaya, Iron, Bismuth, and Strychnia.

Citrate of strychnia.....grs 9
Boiling water.....fl oz ½
Alcohol.....fl oz ½

Dissolve, filter, and add elixir of calisaya, iron and bismuth, q s to make 8 pints 7 fl oz.

18. Elixir of Calisaya, Iron, Pepsin, and Bismuth.

Pyrophosphate of iron.....oz 2 grs 64
Boiling water q s to dissolve.
Elixir of pepsin, bismuth, and calisaya .....q s to make gal 1

19. Elixir of Calisaya, Iron, and Strychnia—

Citrate of strychnia .....grs 10
Boiling water.....fl oz ½
Alcohol.....fl oz ½
Dissolve, filter, and add elixir of calisaya and iron.....q s to make gal 1

(To be continued.)
